EXECUTIVE SUMMARY

Section 120.74, Florida Statutes, requires agencies to prepare a Regulatory Plan that includes: 1) a listing of each new or amended law enacted in the past twelve months that create or modify an agency's duties or authority; 2) a listing of other laws expected to be implemented by the agency before the following July; 3) an update of the prior year's Regulatory Plan identifying rulemaking not initiated by July of the current reporting year; and 4) reports on rulemaking not initiated for laws previously reported as requiring rulemaking.

This Regulatory Plan identifies eight new or amended laws enacted in the 2019 Legislative Session that create or modify the Department's duties or authority. Of these, two require the Department to implement the law by rulemaking and six must otherwise be implemented by rulemaking.

This report also identifies multiple other laws expected to be implemented by rulemaking before July 2020, primarily through amendments of existing rules. In addition, several existing rules are identified for repeal.

This report includes an update to last year's report, and the identification of one required rulemaking noticed on last year's report that was not initiated before July 1, 2019.
