1 Introduction

To protect the health and welfare of children, it is the intent of the Legislature to develop a regulatory framework that promotes the growth and stability of the child care industry and facilitates the safe physical, intellectual, motor, and social development of the child. To that end, the Child Care Regulation Program is responsible for regulating programs that provide services that meet the statutory definition of “child care.” This is accomplished through the inspection of licensed child care programs to ensure the consistent statewide application of child care standards established in statute and rule, and the registration of child care providers not subject to inspection.

The Department regulates licensed child care facilities, licensed family day care homes, licensed large family child care homes, and licensed mildly ill facilities in 62 of the 67 counties in Florida. Five counties have decided—either by statute or by the adoption of a local ordinance or resolution—to designate a local licensing authority to regulate child care providers in their areas. The following counties have elected to exercise this option: Broward, Hillsborough, Palm Beach, Pinellas, and Sarasota.

Local licensing agencies may use the same or different procedures to implement local licensing standards, which must have been determined by the state to meet or exceed the state’s minimum licensing standards. Three of the five local licensing agencies have designated the local County Health Department as the licensing authority. Broward and Hillsborough counties have designated other agencies as the local licensing authority.

1.1 Child Care Programs Subject to Regulation

“Child care” is defined as “the care, protection, and supervision of a child, for a period of less than 24 hours a day on a regular basis, which supplements parental care, enrichment, and health supervision for the child, in accordance with his or her individual needs, and for which a payment, fee, or grant is made for care.” If a child care program meets this statutory definition of “child care,” it is subject to regulation by the Department/local licensing agencies, unless specifically excluded or exempted from regulation by statute.

Every program determined to be subject to licensing must meet the applicable licensing standards established by subsection 402.301-.319, Florida Statutes, and rules.

1.2 Definitions

“Active” is the status of a candidate’s awarded credential or certification signifying requirements have been successfully met.

“Age appropriate” means of the right size, child sized, or adapted so that a child can use safely, and suitable to the chronological age range and developmental characteristics of a specific age group of children or child. This means the materials/equipment should interest and challenge children in terms of their age and abilities. Any materials/equipment with a specified age range by the manufacturer must be followed when being used by children.

“Before-School and After-School site” refers to a program, regardless of location, that provides child care for children who are at least 5 years old and are enrolled in and attend a kindergarten program or grades one and above during a school district’s academic calendar year. This is limited to programs that provide care only before and after the recognized
hours of a district’s school day and on teacher planning days, holidays, and intercessions that occur during the school district’s official academic calendar year.

“Begin training for child care personnel” refers to a candidate’s commencement of at least one of the child care training courses listed in section 402.305(2)(d), F.S., and found in section 4 of this handbook. This may be accomplished by classroom attendance in a Department-approved training course, acquiring an educational exemption from a Department-approved training course, or by receiving results from a Department-approved competency examination within the first 90 days of employment in the child care industry in any licensed Florida child care program. The child care program is responsible for obtaining training documentation from child care personnel.

“Birth Through Five Child Care Credential” is equivalent to a child development associate credential, pursuant to 402.035(3)(b), F.S., and offered through one of the following programs: Florida Child Care Professional Credential (FCCPC), Florida Department of Education Child Care Apprenticeship Certificate (CCAC), and Florida Department of Education Early Childhood Professional Certificate (ECPC). Issuance of a Birth Through Five Child Care Credential certifies successful completion of a department-approved training program that consists of a minimum of 120 hours of early childhood instruction, 480 contact hours with children ages birth through eight years, and a formal observation. Credentials must be documented on CF-FSP Form 5270, April 2006, Florida Child Care Professional Credential Certificate, which is incorporated by reference. A list of approved and recognized Birth Through Five Child Care Credential programs may be obtained from the department’s website at www.myflfamilies.com/childcare.

“Caterer” means a duly-licensed food service business that provides ready-to-be-served meals to a provider. A copy of the license or permit must be in the child care facility and available for review by the licensing authority.

“Classroom/Room/Designated Space” means a learning space or room in which care is provided or classes are held and where learning can take place uninterrupted by outside distractions. The designation of space as a classroom must be reviewed and approved by the licensing authority prior to its use as such. If floor to ceiling walls are not present, the classroom walls must be a minimum of 4 feet in height, anchored to the floor, and constructed in such a manner as to be secure not pose a threat of falling over. The material for the walls must be stable, non-hazardous and not be made of materials such as transparent, plastic, curtains, stacked materials, fabric or mesh materials. An entrance and exit from the classroom that meets fire code requirements must be present.

“Continuing Education Unit (CEU)” is a standard unit of measure of coursework used for training and credentialing purposes. The Department will accept CEUs from educational institutions accredited and recognized by the U.S. Department of Education or from professional organizations with a national affiliation.

“Direct supervision” means actively watching and directing children’s activities within the same room or designated outdoor play area, during transportation, any activity outside of the facility, and responding to the needs of each child while in care.
“Director” means “operator” as defined in section 402.302(13), F.S., who is the on-site administrator or individual who has the primary responsibility for the day-to-day operation, supervision, and administration of a child care facility.

“Director Credential” is a Department-approved comprehensive credential that consists of educational and experiential requirements as referenced in section 4.7 of this handbook.

“Disposable” means and article intended by the manufacturers to be used once and then thrown away.

“Early Childhood Education” refers to coursework, certification, a credential or degree specific to children ages birth through eight years.

“Evening child care” refers to care provided during the evening hours between 6:00 p.m. and 7:00 a.m. the following day.

“Food equipment” means all stoves, ranges, crock pots, microwaves, hoods, tables, counters, cabinets, refrigerators, freezers, sinks, dishwashing machines, and other items used in the preparation, reheating, and serving of food, with the exception of utensils.

“Foster Grandparents” are directly supervised volunteers who participate in the federal program pursuant to 45 Code of Federal Regulations part 2552. Foster grandparents work with one or more children with special or exceptional needs in child care programs. Foster grandparents are not counted in the staff-to-child ratio. Foster grandparents are required to have 100% completion of the Department’s following training courses: Child Care Facility Rules and Regulations; Health, Safety, and Nutrition; Identifying and Reporting Child Abuse and Neglect; and Special Needs Appropriate Practices. This requirement can be by either instructor-led or online training. Foster grandparents must begin training within 30 days of working in the child care industry in any licensed Florida child care facility. Training must be completed within one (1) year from the date of working in the child care industry in any licensed Florida child care facility. Foster grandparents are not classified as child care personnel, and they may not be assigned the roles of teacher’s aides, group leaders, or other similar positions.

“High School Diploma, GED, and/or College Degree” means a diploma or degree obtained from an institution accredited and recognized by the U.S. Department of Education. High school diplomas issued by private schools that are registered with the Florida Department of Education will be accepted. If a high school diploma is earned outside the U.S., it must be translated and evaluated by someone who is a member of the American Translators Association, a credential evaluation agency approved by the Bureau of Educators Certification, or an accredited college/university. If a college degree is earned outside the U.S., it must be evaluated by a credential evaluation agency approved by the Bureau of Educators Certification or an accredited college/university to be equivalent to a U.S. degree.

“Inactive” refers to the status of a candidate’s awarded credential or certification that is no longer active; however, the credential remains eligible for renewal.
“Initial Screening” means a full Level 2 screening which must include, at a minimum, Federal Bureau of Investigation (FBI) and Florida Department of Law Enforcement (FDLE) checks, a search of the criminal history records, sexual predator and sexual offender registry, and child abuse and neglect registry of any state in which the applicant is currently residing or has resided in during the preceding five years.

“Napping” means a brief period of rest during daylight or early evening hours.

“National Early Childhood Credential (NECC)” pursuant to Section 402.305(3)(c), F.S., is an early childhood credential approved by the department and recognized by licensing authorities in at least five states that incorporates 120 hours of early childhood instruction, and 480 contact hours with children ages birth through eight years, and that includes at least two methods of formal assessment. This includes the Child Development Associate (CDA) credential issued by the Council for Professional Recognition in Washington, D.C. A list of approved and recognized NECC programs may be obtained from the department’s website at www.myflfamilies.com/childcare.

“Potentially hazardous food” means any food that requires time-temperature control (refrigeration or hot holding) and contains ingredients such as milk, milk products, eggs, meat, poultry, fish, shellfish, cooked plant food (rice, beans, vegetables, and baked potatoes), tofu, other soy-protein products, mushrooms, cut melon, cut tomatoes, raw sprouts, and untreated garlic/oil mixtures.

“Preparation of food” includes the selection and portioning or combining of ingredients to create food (including bottle preparation) intended for consumption. This definition is not limited to cooking. Excluded from the definition are warming of pre-prepared bottles and pre-prepared food (such as catered food and food provided by a child’s parent or guardian), distributing individually pre-packaged snacks, and learning activities provided by a child care program that may include raw or prepared food. A learning activity may not replace a regularly scheduled meal.

“Professional contribution,” for the purpose of Director Credential renewal, demonstrates a dedication to early childhood or school-age education outside of the child care program responsibilities by engaging in activities that improve the field of early childhood or school-age education. Examples of such a contribution are: active participation in an appropriate membership organization, publishing an article related to early childhood or school-age education, or active participation in rule development workshops.

“Re-screening” is the background screening process that is conducted every five years after the date of the initial screening. Re-screening must include, at a minimum, national and statewide criminal records checks through the FDLE, a search of the sexual predator and sexual offender registry, and Florida’s child abuse and neglect registry.

“Sanitize” means the process of destroying or reducing organisms to a safe level. Includes properly cleaned equipment and surfaces, such as sinks and sleep mats. Sanitation shall be accomplished with the application of a chemical sanitizer or the use of hot water or steam. Sanitizing agents must be used according to the manufacturer label. Sanitizing agents used on food contact surfaces must be labeled by the manufacturer safe for use on food contact surfaces and have specific instructions designed for use on food contact surfaces. The manufacturer’s directions must be followed.
“School-Age Child Care Credential” is equivalent to a child development associate credential, pursuant to 402.035(3)(b), F.S., and offered through one of the following programs: Florida Child Care Professional Credential (FCCPC) and Florida Department of Education School-Age Professional Certificate (SAPC). Issuance of a School-Age Child Care Credential certifies successful completion of a department-approved training program that consists of a minimum of 120 hours of school-age/early childhood instruction, 480 contact hours with school-age children, and a formal observation. Credentials must be documented on CF-FSP Form 5270, April 2006, Florida Child Care Professional Credential Certificate, which is incorporated by reference. A copy of CF-FSP 5270 may be obtained from the department’s website at www.myflfamilies.com/childcare. Active credentials are valid for five years from the date of issuance. A list of approved and recognized School-Age Child Care Credential programs may be obtained from the department’s website at www.myflfamilies.com/childcare.

“Serious Injury,” is any injury/incident resulting in death or serious physical or emotional harm to a child that prudently calls for medical attention, including medication errors that present a risk of ineffectiveness or adverse reaction.

“Serving food,” means the provision of meals and snacks to children.

“Single-service articles” means any cups, containers, plates, straws, place mats, napkins, doilies, spoons, stirrers, paddles, knives, forks, wrapping materials and all similar articles that are constructed wholly or in part from paper, paperboard, molded pulp, foil, wood, plastic, synthetic or other readily destructible materials, and which are intended by the manufacturers to be for one-time, one-person use, then to be discarded.

“Sleeping” means the normal night time sleep cycle.

“Tableware” means utensils used for eating, drinking, and serving food including forks, knives, spoons, bowls, and cups and serving dishes. Tableware may be either multi-use or single service.

“Training Transcript” is the electronic documentation of statutorily mandated training and staff credential qualifications for child care personnel. Training transcripts may be obtained from the Department’s website at www.myflfamilies.com.

“Utensils” means pots, pans, ladles, pitchers, cutting boards, knives, or food containers used in the preparation, storage, transportation, or serving of food.

“Weighted score” means a scaled score, rather than a percentage score, based on the difficulty of the exam and determined by competency exam professionals in consultation with subject matter experts.

“Year of experience” as it relates to the Director Credential, is equivalent to a minimum of 1,040 hours of paid and/or nonpaid documented work experience as a child care facility director, co-director, assistant director, or as a lead teacher in a Head Start Program.
2 General Requirements

2.1 License Application Process or Renewal

A. All fines imposed through the administrative process or an administrative hearing against an applicant must be paid before a license can be issued. If, at the time of a license renewal application, there is a pending administrative hearing resulting only from a proposed fine, it shall not affect the renewal of the license. If, at the time of a license renewal application, there is a pending revocation proceeding a satisfactory inspection is required and the issuance of a license is dependent upon the final order.

B. In such case, the provider will not be issued a renewal license until the final order is entered and any fine imposed has been paid. If the provider has filed a timely and sufficient application for the renewal of a license, the provider will be able to continue to operate as long as provisions are in place to ensure the continued health and safety of the children in care during the application determination and any subsequent administrative hearing. This provision does not limit the Department’s authority to issue an emergency suspension order.

C. For the purpose of issuing a license, any out-of-state criminal offense, which if committed in Florida would constitute a disqualifying offense, shall be treated as a disqualifying offense for screening purposes.

D. The provider is responsible for confirming with the county/city zoning authority that the property can be used for the operation of child care prior to operation. The “land use” must be applied correctly to avoid noncompliance with county/city zoning and potential fines or closure.

E. The child care facility must not be used for any business or purpose unrelated to providing child care that can interfere with compliance with child care standards or permit the presence of individuals who do not meet screening and training requirements (with the exception of parents of children in care) when children are present. A child care facility that utilizes any area that is subject to use by persons outside of the program must have exclusive control of such area when used by the program and provide effective measures to exclude individuals who do not meet screening and training requirements from that area.

2.2 Minimum Age Requirements

A staff person at least 21 years of age must be in charge of the program and must be on the premises at all times during operating hours.

2.3 Ratios

A. The staff-to-child ratio, as established in Section 402.305(4), F.S., is based on primary responsibility for the direct supervision of children, and applies at all times while children are in care.

B. When caring for children from birth to twelve months of age, there must be at least one (1) child care personnel for every four (4) infants in care (1:4).

C. When caring for children from twelve (12) months to twenty four months (24), there must be at least one (1) child care personnel for every six (6) one year old children (1:6).
D. When caring for children two (2) years old but not yet three (3), there must be one (1) child care personnel for every eleven (11) two year old children (1:11).

E. When caring for children three (3) years old but not yet four (4), there must be one (1) child care personnel for every fifteen (15) three year old children (1:15).

F. When caring for children four (4) years old but not yet five (5), there must be one (1) child care personnel for every twenty (20) four year old children (1:20).

G. When caring for children five (5) years of age and above, there must be at least one (1) child care personnel for every twenty-five (25) school-age children (1:25).

2.3.1 Mixed Age Groups

A. In groups of mixed age ranges, where children under one year of age are included, one staff member must be responsible for no more than four children of any age group, at all times.

B. In groups of mixed age ranges, where children one year of age but under two years of age are included, one staff member must be responsible for no more than six children of any age group, at all times.

C. In groups of mixed age ranges, where children are age two and above, ratio is determined by the age group with the largest number of children.

2.3.2 Credential Staff Ratio

For every 20 children, a child care facility must have one (1) credentialed staff member pursuant to Section 402.305(3), F.S.

2.4 Supervision

A. Personnel must position themselves in the outdoor play area so that all children can be observed and directly supervised.

B. Child care personnel must be assigned to provide direct supervision to a specific group of children and be with that group of children at all times.

C. Supervision standards apply at all times away from the child care facility, including during field trips, outdoor play, and when picking up or dropping off children at designated locations, such as bus stops, school, or a child’s home. For school-age children, personnel must know where the children are and what they are doing at all times.

D. At all times, lighting must allow child care personnel to see and supervise children while in care.

E. A telephone or other means of instant communication must be available to staff responsible for children during all field trips. Cellular phones, two-way radio devices, citizen band radios, and other means of instant communications are acceptable.

F. A program must not release a child to any unauthorized individual. All individuals authorized to pick up a child must be identified in writing by the parent or guardian to the program, and the program must verify using picture identification.
G. No person can be an operator, owner, or employee of a child care facility while using or under the influence of narcotics, alcohol, or other drugs that impair a person’s ability to provide safe care and supervision.

H. In addition to the number of staff required to meet the staff-to-child ratio, one additional adult must attend field trips away from the child care facility to help provide direct supervision. The individual could be a parent volunteer as long as that person is under direct and constant supervision of a screened and trained staff member.

I. During evening child care hours, staff must remain awake at all times. While children are awake, direct supervision must be provided.

J. Children must receive supervision and care in accordance with their age and required needs, and be accounted for at all times while bathing or toileting.

2.4.1 Nap time Supervision
During nap time, staff must be within sight and hearing of all the children. All other staff required to meet the staff-to-child ratio must be within the building on the same floor and available to be summoned if needed to ensure the safety of the children. Nap time supervision does not apply to children up to 24 months of age, who must have direct supervision at all times.

2.4.2 Meal time Supervision
A. During feeding times, children must be individually fed and provided their own tableware and be supervised appropriately for their ages and developmental abilities.

B. Infants must be held for bottle feedings until they are developmentally ready to sit in an age appropriate chair with good head control. Children must not be left in high chairs or other types of feeding chairs other than feeding times. The use of safety straps is required to prevent children from falling out of the high chair.

C. There must not be any propped bottles. If a child cannot hold the bottle, a staff person or volunteer must hold the bottle during feeding. There must be no automatic feeding devices unless prescribed by a doctor and documentation is available in the child’s file.

2.4.3 Water Activity Supervision
If a facility uses a swimming pool that is more than three feet deep or uses beach or lake areas for water activities, the following requirements must be met:

A. There must be one person with a certified lifeguard certificate or equivalent present. This person can also serve as the additional adult to meet the requirement in number 9 above, or

B. A certified lifeguard must be on duty and present when any children are in the swimming area.
2.5 Transportation

It is necessary for the safety of children to require that the caregiver comply with minimum requirements for governing transportation of children in care in the absence of the parent/guardian.¹

2.5.1 Driver Requirements

The driver of any vehicle used by a child care program to provide transportation must have the following:

A. A valid Florida driver’s license including the proper endorsement;

B. An annual physical examination which grants medical approval to drive, and valid certificate(s) of course completion for first aid training and infant and child cardiopulmonary resuscitation (CPR) procedures.

2.5.2 Transportation Log

A log must be maintained for all children being transported in the vehicle. The log must be retained on file at the facility for a minimum of 12 months and available for review by the licensing authority. The log must include each child’s name, date, time of departure, time of arrival, the signature of the driver, and the signature of a second staff member or person(s) authorized by the provider to verify the driver’s log and that all children have left the vehicle.

A. Prior to transporting children, the driver’s log must be recorded, signed, and dated immediately, verifying that all children were accounted for and that the log is complete.

B. Upon arrival at the destination, the driver of the vehicle must:

1. Mark each child off the log as the child departs the vehicle;

2. Conduct a physical inspection and visual sweep of the vehicle interior to ensure that no child is left in the vehicle; and

3. Record, sign, and date the driver’s log immediately, verifying that all children were accounted for, and that the visual sweep was conducted.

4. Ensure that a second staff member signs and dates the Driver’s Log verifying that all children were accounted for, and that the log is complete.

C. Upon arrival at the destination, a second and different staff member must:

1. Conduct a physical inspection and visual sweep of the vehicle to ensure that no child is left in the vehicle; and

2. Sign, date and record the driver’s log immediately, verifying that all children were accounted for, and that the log is complete.

¹ Caring for Our Children: National Health and Safety Performance Standards, cfoc.nrckids.org
2.5.3 Emergency Care Plans
Contact information for the parent or custodian of each child being transported must be in the vehicle during transport. When transporting children with chronic medical conditions (such as asthma, diabetes or seizures), their emergency care plans and supplies or medication must be available in the vehicle. The responsible adult in the vehicle must be trained to recognize and respond appropriately to a medical emergency.

2.5.4 Vehicle Requirements
For the purpose of this section, vehicles refer to those owned, operated or regularly used by the child care program, and vehicles that provide transportation through a contract or agreement with an outside entity. Parents’ personal vehicles used for transporting during field trips are excluded from meeting the requirements of this sub-section.

A. All vehicles regularly used to transport children must be inspected annually by a mechanic to ensure that they are in proper working order. Documentation by the mechanic must be maintained in the vehicle.

B. The maximum number of individuals transported in a vehicle may not exceed the manufacturer’s designated seating capacity or the number of factory installed seat belts.

C. Each vehicle must be equipped with contact information for all children being transported. When transporting children with chronic medical conditions (such as asthma, diabetes, or seizures), their emergency care plans and supplies or medication must be available. The responsible adult must be trained to recognize and respond appropriately to an emergency.

D. When transporting children, staff-to-child ratios must be maintained at all times. The driver may be included in the staff-to-child ratio if he or she meets screening and training requirement.

E. All child care facilities must comply with the insurance requirements found in Section 316.615(4), F.S. Documentation shall be maintained at the facility.

F. Each child transported must be dropped at the designated location and released to an authorized individual as agreed upon by the provider and the custodial parent/legal guardian.

2.5.5 Seat Belt/Child Restraints
Each child, when transported, must be seated in a back seat in an individual factory installed seat belt or federally approved child safety restraint. The child safety restraint must be installed, secured and used in accordance with
the manufacturer’s instructions and a copy of such instructions must be maintained (in the vehicle and/or on file).

A. All children aged through 3 years, such restraint device must be a separate carrier or a vehicle manufacturer’s integrated child seat.

B. For children aged 4 through 5 years, a separate carrier, a manufacturer’s integrated child seat, or a child booster seat must be used with appropriate seat belt.

C. All children 5 and older must be in seat belts.

2.6 Planned Activities
Facilities should have a written, comprehensive and coordinated planned program of daily activities based on a statement of principles of the facility and each child’s individual development, as well as appropriate activities for groups of children at each stage of development. A written description of the planned program of daily activities slows staff and parents/guardians to have a common understanding and gives them the ability to compare the program’s actual performance to the stated intent.  

Each group or class must have a written and followed plan of scheduled activities posted in an easily seen location accessible to parents. The written plan must meet the needs of the children being served and must include alternate activities in case of bad weather. The written plan also must include scheduled activities that:

A. Promote emotional, social, intellectual, and physical growth;

B. Do not have children left in confining devices such as car seats as an alternative to active play or adult/child interaction, supervision, or discipline;

C. Do not include the use of electronic media for children under two years of age. Electronic media may only be used for educational purposes or physical activity for children 2 years of age and older for no more than 1 to 2 hours per day.

D. Include both active and quiet play, Active play includes outdoor activities a minimum of twice per day, weather permitting.

E. Include meals, snacks, and nap times, if appropriate for the age and the times children are in care.

F. Provide adequate time and space for infants in care to engage in activities that promote development of movement skills (tummy time, crawling, turning over, sitting, etc.). Infant seats (swings, bouncers, etc.) should be used only for short periods of time, no more than 15 to 30 minute intervals per infant and no more than two times per day that the child is in care. Infants in care shall be provided opportunities for outdoor time each day that weather permits.

G. Infants birth to 12 months must have adequate time and space to engage in activities that promote development of movement skills (tummy time, crawling, turning over, sitting, etc.). Infant seats (swings, bouncers, etc.) should not be used for more than 15 to 30 minute intervals and no more than two times per day that the child is in care.

---

2 Caring for Our Children: National Health and Safety Performance Standards, Page 49, cfoc.nrcnkids.org
H. An appropriate daily schedule provides flexibility and contains transition periods that help children move smoothly from one activity to another.

I. Providers are encouraged to inform parents and legal guardians of their child’s activities on a daily basis.

2.7 Field Trip Activities
A. Parents must be advised in advance of each field trip activity.
B. The date, time, and location of the field trip must be posted in an easily seen location at least two working days prior to each field trip.
C. Written parental permission must be obtained in the form of a general or event-specific permission slip.
D. If special circumstances arise where notification of an event cannot be posted for two working days, individual permission slips must be obtained from the custodial parent or legal guardian for each child participating on the field trip.
E. Emergency contact information for each child on the field trip, including walking field trips, must be in the possession of a child care personnel on the field trip.
F. Documentation of parental permission for field trips must be maintained for at least 4 months.

2.8 Child Discipline
A. The child care facility shall adopt a discipline policy consistent with Section 402.305(12), F.S., including standards that prohibit children from being subjected to discipline which is severe, humiliating, frightening, or associated with food, rest, or toileting. Spanking or any other form of physical punishment is prohibited.
B. The child care facility operators, employees, substitutes, and volunteers must comply with written discipline policy.
C. Verification that the child care facility has provided the parent or guardian a written copy of the disciplinary policy used by the program must be documented on the enrollment form with the signature of the custodial parent or legal guardian.
D. Active play, both indoor and outdoor, must not be withheld from children who misbehave.
E. A copy of the written discipline policy must be available for review by the parents or legal guardian and the licensing authority.
F. The following discipline techniques shall be prohibited in the child care facility:
   1. The use of corporal punishment/including, but not limited to:
      a. Hitting, spanking, shaking, slapping, twisting, pulling, squeezing, or biting;
      b. Demanding excessive physical exercise, excessive rest, or strenuous or bizarre postures;
      c. Compelling a child to eat or have in his/her mouth soap, food, spices, or foreign substances;
d. Exposing a child to extremes temperature.

2. Isolating a child in an adjacent room, hallway, closet, darkened area, play area, or any other area where the child cannot be seen or supervised.

3. Binding, tying or restrict movement, or taping the mouth;

4. Using or withholding food or beverages as a punishment;

5. Toilet learning/training methods that punish, demean, or humiliate a child;

6. Any form of emotional abuse, including rejecting, terrorizing, extended ignoring, isolating, or corrupting a child;

7. Any abuse or maltreatment of a child;

8. Abusive, profane, or sarcastic language or verbal abuse, threats, or derogatory remarks in front of the child or about the child or child’s family;

9. Placing a child in a crib/porta-crib for a time-out or for disciplinary reasons.

3 Physical Environment

Children are much more vulnerable to exposures of contaminated environmental media materials than adults because their bodies are developing. They eat more, drink more, and breathe more in proportion to their body size; and their behavior. Both the design structure and a lack of maintenance can lead to exposure of children to physical injury, mold, dust, pests, and toxic materials.\textsuperscript{3}

3.1 General Health and Safety Requirements

A. All child care facilities must be clean, in good repair, free from health and safety hazards and from evidence of, or presence of, vermin infestation.

B. It is the responsibility of the director/operator to ensure all areas and equipment of the facility are free from fire hazards, such as lint build up in heating and air vents, filters, exhaust fans, ceiling fans, and dryer vents. This includes grease build-up in ovens, stoves and food equipment.

C. Animals must be properly vaccinated, free from disease, and clean. Parents must be informed in writing of all animals on the premises. Notice may be provided by a conspicuously posted notice or bulletin, policy handbook, parent flier, or a statement included on the enrollment form. Current vaccinations records must be available for review by the licensing authority. No animal may freely roam the indoor/outdoor premises. Animals are prohibited in areas where food is prepared, stored, or served. If animals or birds are kept in classrooms, they shall be caged and cages must be kept clean.

D. Strangulation hazards strings and cords long enough to encircle a child neck such as

\textsuperscript{3} Caring for Our Children: National Health and Safety Performance Standards, Pages 200-201, cfoc.nrckids.org
those on toys and window coverings should not be accessible to children in care.

E. Pursuant to Chapter 386, F.S., smoking is prohibited, including e-cigarettes, within the child care facility, all outdoor areas, during field trips, and in vehicles when being used to transport children. Owners/operators are to notify custodial parents and legal guardians, in writing, that smoking is prohibited on the premises of the child care facility.

F. Design and construction of a new child care facility or modifications to an existing facility must meet the requirements of the applicable local governing body. The facility must provide current written approval from the local governing body to verify compliance with building requirements.

G. Cleaning must not take place while rooms are occupied by children except for general clean-up activities that are part of the daily routine. General cleaning refers to cleaning necessary to maintain a sanitary environment but that does not pose a hazard to children, such as cleaning with hazardous materials or cleaning which poses a risk of slipping or falling.

H. Pest control must not take place while rooms are occupied by children.

3.2 Toxic/Hazardous Material/Firearms/Weapons

A. All areas and surfaces accessible to children must be free from toxic substances, bio contaminants, and hazardous materials/equipment/tools, including power tools.

B. All potentially harmful items, including cleaning supplies, flammable products, poisonous, toxic, and hazardous materials, must be labeled. These items, as well as knives, sharp tools, and other potentially dangerous hazards, must be stored in a locked area or must be inaccessible and out of a child’s reach at all times.

C. Firearms and weapons, as defined in section 790.001, F.S., are prohibited within any building or upon any person located on the premises, excluding federal, state or local law enforcement officers.

D. Narcotics, alcohol, or other impairing drugs must not be present on the premises.

3.3 Rooms Occupied by Children

3.3.1 Lighting

A. All areas of the facility must have lighting that provides adequate illumination and comfort for facility activities, a minimum of 20 foot-candles of lighting is required. Lighting must be sufficient to allow for adequate supervision and safe entering and exiting of the room.

B. For reading, homework, painting and other close work areas, 50 foot-candles at the work surface is required.

C. During naptime, lighting must allow staff to visually observe and supervise children.

3.3.2 Windows and Screens

When the windows or doors are open, for more than entering/exiting purposes, all buildings must have and maintain screens to prevent entrance of
any insects or rodents. Screens are not required for open-air classrooms and picnic areas.

3.3.3 Temperature and Ventilation
A. An inside temperature of 65 to 82 degrees Fahrenheit must be maintained at all times.

B. Adequate ventilation must be maintained in all areas of the facility, in particular in areas where arts and crafts are conducted, and during any cleaning, sanitizing, or disinfecting procedure, to prevent children and child care personnel from inhaling harmful or potentially toxic fumes.

3.4 Licensed Capacity

3.4.1 Licensed Capacity
A. The capacity, as calculated by the licensing authority, must be posted in a conspicuous location within each room.

B. The licensed capacity of a child care program is determined by the following factors:
   a) Indoor floor space
   b) Outdoor square footage
   c) Sewer/septic capacity (as determined by Environmental Health)
   d) Number of toilets/wash basins

Licensed capacity is determined by the most restrictive of these factors.

C. The total number of children in care on-site and while on field trips may never exceed the facility’s licensed capacity.

3.4.2 Indoor Square Footage/Usable Floor Space
A. A child care that had a valid license on October 1, 1992 must have a minimum of 20 square feet of usable indoor floor space for each child. A child care facility that did not hold a valid license on October 1, 1992 and seeks approval to operate as a child care facility must have a minimum of 35 square feet for each child.

B. Usable indoor floor space refers to space available for indoor play, classroom, work area, or nap area.

C. To determine overall facility capacity, usable indoor floor space is calculated by measuring at floor level from interior walls and by deleting space for stairways, toilets and bath facilities, permanent fixtures and nonmovable furniture. Kitchens and designated food preparation areas, offices, laundry rooms, storage areas, hallways, and other areas not normally used or accessible to the children in daily operations are not included when calculating usable indoor floor space to determine total facility capacity.
D. Each room routinely used as a classroom must provide the minimum 35 square footage of usable indoor floor space per child.

E. Shelves or storage for toys and other materials will be considered as usable indoor floor space if accessible to children.

F. Where infants are in care, they must have open indoor floor space outside of cribs and playpens. The space used for play may be the same space used for cribs and play pens, if the cribs and play pens can be moved to allow for open floor space.

3.4.3 Multipurpose Rooms

A. Space that is used as a common dining area or for large group assemblies/activities is included in the usable indoor floor space for purposes of determining overall facility capacity.

B. Common area (i.e., multiple purpose rooms or dining rooms) square footage may not be counted in such a manner as to expand the capacity of individual rooms in the facility.

C. Square footage per child and room capacity are determined on a room-by-room basis.

D. While a common area is being used for dining or specific large group assemblies/activities (special events), the applicable 20- or 35- square foot requirement of usable indoor floor space does not apply, although supervision and ratios must still be maintained. This means that for special events, the overall room capacity may be greater than it would be under normal use; however, the facility must maintain minimum square footage per child in accordance with the local fire authority requirements.

E. Common area square footage may not be counted toward the facility’s overall capacity unless the space is used regularly and other classroom capacity requirements are not exceeded.

3.4.4 Outdoor Square Footage

The play area must be sufficient and safe to allow freedom of movement without collisions among active children. Children benefit from being outside as much as possible, and it is important to provide sufficient outdoor space to accommodate them.\(^4\)

A. There must be a minimum of 45 square feet of usable, safe, and sanitary outdoor play area per child, one year of age and older. At a minimum, the outside play area must be able to accommodate one-half of the licensed capacity of the program.

B. For the purposes of a licensed urban child care facility, an additional minimum of 45 square feet of usable indoor play space for 25% of the licensed capacity shall be substituted for outdoor play space. The urban child care facility must provide this additional indoor space with
equipment that provides physical activity appropriate to the age of the children.

C. Based on the outdoor square footage, the total number of children using the play area may not exceed the outdoor capacity.

### 3.5 Outdoor Play Area

A. The outdoor play area must be clean and free from litter, nails, glass and other hazards.

B. The outdoor area must be designed to allow child care personnel to clearly see children while playing on all equipment.

C. The outdoor play area must provide shade. Shade may be provided by trees, buildings, or structures.

D. Metal and dark colored equipment may not be utilized when in direct sunlight.

#### 3.5.1 Fencing

A. The facility’s outdoor play area must be fenced as required by local ordinances to prevent access by children to all water hazards within or adjacent to outdoor play areas, such as pools, ditches, retention ponds, and fish ponds.

B. The outdoor play area must have adequate fencing or walls a minimum of 4 feet in height. Fencing, including gates, must be continuous and must not have gaps that would allow children to exit the outdoor play area. The base of the fence must remain at ground level, and be free from erosion or build-up to prevent inside and outside access by children or animals.

### 3.6 Napping/Sleeping

For the purposes of these requirements, “sleeping” refers to the normal night-time sleep cycle, while “napping” refers to a brief period of rest during daylight or early evening hours.

#### 3.6.1 Bedding and Linens

Each child in care must be provided safe and sanitary bedding to be used when napping or sleeping. Nap bedding is not required for school-age children; however, the program must provide an area for children that choose to rest.

A. Sleep bedding includes beds, cribs, or mattresses (excluding air mattresses or a foam mattress).

B. If children are sleeping overnight in the program facility, program staff must ensure accepted bedtime routines are practiced, such as brushing teeth and washing face and hands.

1. Toothbrushes, towels, and wash cloths may not be shared.

2. Toothbrushes must be stored so that they cannot touch each other.

C. Nap bedding includes sleep bedding, cots, playpens, or floor mats.
D. Floor mats must be at least one inch thick, and covered with an impermeable surface that is cleaned and sanitized or disinfected after each use.

E. Bedding must be appropriate for the child’s size.

F. Linens, if used, must be washed at least once a week and more often if soiled or dirty. Linens used by more than one child must be washed in between usage. Linens must be provided when children are sleeping, and pillows and blankets must be available.

G. Bedding and linens, when not in use, must be stored in a sanitary manner which prevents the spread of germs or lice from other linens.

H. Bedding and linens shall not be stored in the bathroom, unless stored in cabinets.

I. No double or multi-deck cribs, cots, or beds may be used.

3.6.2 Nap/Sleep Space
A. Each child care program must include a designated area where each child can sit quietly or lie down to rest or nap.

B. When not in use, napping space and indoor floor space may be used interchangeably as indoor floor space.

C. A minimum of 18 inches must be maintained around individual napping and sleeping spaces. A maximum of two sides of a napping or sleeping space may be against a solid barrier, such as the wall. The solid side of a crib does not meet the requirements for a solid barrier.

D. Napping and sleeping spaces must not be under furniture or against furniture that creates a hazard.

E. Napping and sleeping areas must not be in exit areas. All exits must remain clear in accordance with fire safety requirements.

3.6.3 Crib Requirements
Children up to one year of age must be in a crib, porta crib, or playpen with sides for napping. Crib sides must be secured while there is an infant in the crib. Bar spacing must not exceed two and three-eighths inches. Cribs must meet the regulations as outlined in Title 16, Parts 1219 & 1220 Code of Federal Regulations.

3.6.4 Safe Sleep
A. All personnel that care for infants must follow safe sleep practices as recommended by AAP. Cribs must have tight fitted sheets, no excess bedding, no bumper pads, hanging mobiles, no quilts, no comforters, and no cushions.

B. All programs must have a written policy and procedure to identify and prevent shaken baby syndrome and abusive head trauma. All personnel who are in direct contact with children including substitutes and volunteers
should have training on preventing shaken baby syndrome and abusive head trauma; recognition of signs and symptoms of shaken baby syndrome and abuse head trauma; strategies for coping with crying, fussing, or distraught child and the development and vulnerabilities of the brain in infancy in early childhood.

C. When napping or sleeping, young infants that are not able to roll over they must be positioned on their backs and on a firm surface to reduce the risk of Sudden Infant Death Syndrome, unless an alternate position is authorized by a physician. Written documentation of this authorization must be on file at the facility.

3.7 Restrooms and Bath Facilities

A. Each child care facility must provide and maintain bathroom facilities that are easily accessible, and at a height usable by the children. Platforms may be used if they are safely constructed and have an impervious surface that can be easily cleaned and sanitized.

B. Facilities must have a sufficient number of toilets and sinks for the number of children being served. For facilities having from one to fifteen children, there must be at least one toilet and one sink. There must be at least one additional toilet and sink for every 30 children thereafter. For design and construction of a new child care facility or modification to an existing facility, the program must submit copies of permits obtained to do the work or proof that the permit was satisfied according to the city/county local jurisdiction.

C. If only diapered infants are in care at the facility, then one toilet and two sinks per 30 infants is required.

D. Potty chairs, if used, shall be in addition to the toilet requirements, and must be cleaned and sanitized or disinfected after each use.

E. Bathrooms must not open directly into an area where food is prepared. A toilet facility may open directly into an area used by children where food is served, such as into a classroom where tables/chairs have multiple uses.

F. Children must receive supervision and assistance as required by their age and required needs. They must be accounted for at all times while bathing and toileting.

G. Every facility must have at least one portable or permanent bath facility available for bathing children. The portable or permanent bath facility must be in good operation, clean and must be sanitized or disinfected after each use.

H. Running water, soap, trash receptacles, toilet paper, and disposable towels or hand-drying machines that are properly installed and maintained must be available and within reach of children using the bathroom.

I. Each toilet and sink must be maintained in good operating condition, cleaned and sanitized or disinfected as needed, but at least once per day.
3.8 Fire Safety and Emergency Preparedness

Regular fire safety checks by trained officials (i.e. fire department inspector or building code inspector) will ensure that a child care facility continues to meet all applicable fire safety codes. Regular emergency and evacuation drills/exercises constitute an important safety practice in areas where these natural or human-generated disasters might occur. The routine practice of such drills fosters a calm, competent response to a natural or human-generated disaster when it occurs. Turnover of both staff and children, in addition to the changing developmental abilities of the children who participate in evacuation procedures in child care, necessitate frequent practice of the exercises. There must be a plan to account for all children and adults in a facility at the time of an evacuation. Practice accounting for children and adults during evacuation drills makes it easier to do in an emergency.5

3.8.1 Operable Phone

There must be at least one dedicated operable corded telephone that is neither locked nor located at a pay station that is available to all child care personnel at all times during the hours of operation.

3.8.2 Fire Safety

A. Unless statutorily exempted, all child care facilities must conform to state standards adopted by the State Fire Marshal, Chapter 69A-36, F.A.C., Uniform Standards for Life Safety and Fire Prevention in Child Care Facilities, and must be inspected annually. A copy of the current and approved annual fire inspection report by a certified fire inspector must be on file with the licensing authority. If the program is granted a fire inspection exemption by the local fire inspection office, the exemption must be documented and maintained on file at the program.

B. Fire extinguishers must be properly maintained, serviced, and tagged with a minimum rating of 2A10BC at all times.

C. All staff shall be knowledgeable in the use and operation of a fire extinguisher within 30 days of employment.

D. The distance to the nearest extinguisher shall not be more than 75 feet from rooms occupied by children. A fire extinguisher must be present in areas where food is prepared.

E. Automatic range-top fire suppression systems are required in the kitchen for facilities that deep fry food. Suppression hood systems must be maintained and inspected in accordance with the Florida Fire Prevention Code as adopted in Chapter 69A-60, F.A.C.

3.8.3 Exit Areas

A. Exits should be clearly identified and visible at all times during operation of the child care facility.

---

B. The exits should be clearly marked, identifying the path to safety in case of an emergency. The exits should not be blocked at any time.

3.8.4 Fire Drills
A. During the facility’s license year, fire drills utilizing the approved alarm system must be conducted monthly at various dates and times when children are in care. When the alarm is sounded, all adults and children must evacuate the facility.

B. When the facility’s approved fire alarm alert system is activated or initiated, all adults and children must evacuate the facility.

C. A current attendance record must accompany staff out of the building during a drill or actual evacuation, and be used to account for all children. When the facility’s approved alarm system is activated, all adults and children must evacuate the facility. The operator must maintain a written record of the fire drills showing the date, number of children and staff in attendance, evacuation route used, and time taken for all individuals to evacuate the premises. Each fire drill record must be maintained for a minimum of two years from the date of the fire drill. The fire drills conducted must include, at a minimum:
   1. One fire drill using an alternate evacuation route,
   2. One fire drill during napping/sleeping times, and
   3. One fire drill in the presence and at the request of the licensing authority. This drill will be coordinated with the operator or designee.

3.8.5 Emergency Preparedness
A. The operator must develop a written emergency preparedness plan that includes at a minimum, procedures to be taken by the facility during a fire, shelter in place, lockdown, and inclement weather (for example: hurricanes, tropical storms or tornadoes), and to facilitate parent/guardian reunification onsite and offsite at a designated offsite location. The plan must describe how the facility will meet the needs of all children, including children with special needs, during and following an emergency event.

B. Lockdown and inclement weather drills shall be conducted two times per operating year when children are in care and the documentation of these drills must be maintained for two years. A current attendance record/classroom rosters must accompany staff during the drill or actual emergency and must be used to account for all children. Documentation of this substitution must be maintained for two years.

C. The operator must maintain and post in an easily seen location a written record of emergency preparedness drills showing the type of drill, date conducted, number of children and staff in attendance, and time taken for all individuals to complete the drill.
D. Documentation of conducted fire and emergency preparedness drills must be available at the time of inspection. Documentation produced after the inspection will not be used to meet the licensing standard or corrective action requirements.

E. The operator must prepare and post an emergency evacuation plan in each room of the facility, excluding restrooms, including a diagram of safe routes by which the personnel and children may exit in the event of fire or other emergency requiring evacuation.

3.8.6 After a Fire, Man-made, or Natural Disaster
After a fire, man-made, or natural disaster, the operator must notify the licensing authority within 24 hours of operational status in order for the licensing authority to ensure health standards are being met for continued operation.

3.9 Food Preparation/Food Service

3.9.1 Food Preparation Area
A food preparation area is a designated room, such as a kitchen or a designated space in a facility not normally used or accessible to the children in daily operations for indoor play, classroom, work or nap spaces, and not included when calculating usable indoor floor space.

A. A food preparation area is required for facilities that choose to prepare food in a manner consistent with the definition of “preparation of food”. Specific requirements for the food preparation area include:

1. Ventilation provided either by mechanical or natural means to provide fresh air and control of unpleasant odors, such as a fan, vent, or open window with a screen.
2. Smooth, nonabsorbent food contact surfaces with no unsealed cracks or seams. Food-contact surfaces are surfaces of equipment, countertops, utensils, etc., that food comes into contact with during food preparation.
3. Food equipment maintained and stored in a sanitary manner and out of the reach of children.
4. Shielded lighting.
5. Nonabsorbent and easily-cleaned walls, flooring, and floor covering.
6. Easily cleanable and replaceable ceiling in the event of water and other damage, mildew or mold.
7. A separate handwashing station with hot running water, a minimum of 100 degrees Fahrenheit. The handwashing station must include a sink with running water and drainage, soap, trash can, and disposable towels or hand-drying machines that are properly installed and maintained. Handwashing stations must include posted signs visible to employees and children, demonstrating proper handwashing technique. Portable sinks may not be used for dishwashing or food preparation. If
A portable sink is used for handwashing in the food preparation area, hot water must be provided.

8. Leak-proof, non-absorbent containers, covered with a tight-fitting lid, for all food waste stored inside the facility. The container must be emptied, cleaned, and sanitized or disinfected daily.

9. A food preparation area clean and free of dust, dirt, food particles, and grease deposits.

B. Employees, volunteers, and substitutes, while working in the food preparation area, must wear proper head covering, such as a hair net or hat. To prevent contact with ready-to-eat foods, staff must use clean disposable gloves, utensils, or similar items in the food preparation area.

C. For safety, children must not be present in the food preparation area when meals and snacks are prepared unless while being supervised or participating in a cooking activity.

3.9.2 Food Storage

Storage of food off the floor in a safe and sanitary manner helps prevent food contamination from cleaning chemicals or spills of other foods, and keeps insects and rodents from entering the products. Safe handling and storage of all food is a basic principle to prevent and reduce food-borne illnesses. Keeping cold food below 41 degrees Fahrenheit and hot foods above 135 degrees Fahrenheit prevents bacteria growth. Food intended for human consumption can become contaminated if left at room temperature.\(^6\)

Facilities choosing to prepare food must have a designated space for food storage within the designated food preparation area or in a room not calculated as part of indoor floor space, and in an area not used for diapering. Off-site food storage is permissible only if the site of storage is a licensed child care facility under the same ownership that includes a food preparation area that meets licensing standards.

A. Food containers, such as cans, plastic containers, boxes and bags must be stored above the floor on clean surfaces protected from splash and other contamination.

B. Stored food must be consumed or discarded on or before the expiration dates listed by the manufacturer.

C. Poisonous/toxic chemicals or cleaning products must be stored separately from food.

D. Opened packages or perishable or leftover food items must be properly covered or sealed in containers or bags, labeled with the date, and properly stored and discarded within seven calendar days.

\(^6\) Caring for Our Children: National Health and Safety Performance Standards, Page 190, cfoc.nrckids.org
E. Opened packages of dried goods must be properly covered/sealed, properly stored, and discarded according to the manufacturer’s recommended date or if the quality of the food has been compromised.

F. Refrigerators/freezers:

1. An accurate alcohol thermometer designed to measure cold storage temperature must be placed inside each refrigeration and freezer unit. Thermometers in refrigerators must show a reading of 41 degrees Fahrenheit or below, and thermometers in freezers must show a reading of 0 degrees Fahrenheit or below. The thermometer must be located in the center of the unit and be readily accessible. Thermometer temperature readings higher than specified above require further temperature testing of food samples stored in the unit using a probe type thermometer; and adjustments to the unit setting to reach and maintain the required readings.

2. Food may be frozen prior to the expiration date, but when thawed, it must be labeled with the date it was removed from the freezer and discarded within seven calendar days.

3. Frozen food must be labeled by date and type noted below and stored according to the following table:

<table>
<thead>
<tr>
<th>Food Item</th>
<th>Months</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bacon and sausage</td>
<td>1 to 2 months</td>
</tr>
<tr>
<td>Casseroles</td>
<td>2 to 3 months</td>
</tr>
<tr>
<td>Frozen dinner and entrees</td>
<td>3 to 4 months</td>
</tr>
<tr>
<td>Ham, hot dogs, lunch meats</td>
<td>1 to 2 months</td>
</tr>
<tr>
<td>Meat, uncooked</td>
<td>4 to 12 months</td>
</tr>
<tr>
<td>Meat, uncooked ground</td>
<td>3 to 4 months</td>
</tr>
<tr>
<td>Meat, cooked</td>
<td>2 to 3 months</td>
</tr>
<tr>
<td>Poultry, cooked</td>
<td>4 months</td>
</tr>
<tr>
<td>Soups and stews</td>
<td>2 to 3 months</td>
</tr>
</tbody>
</table>

3.9.3 Food Safety
Handling of food in a safe and careful manner prevents the spread of bacteria, viruses and fungi. Outbreaks of foodborne illnesses have occurred in many settings, including child care facilities. Meals and snacks should contain, at a minimum, the meal and snack patterns shown for toddlers and preschool age children in the Child and Adult Food Program guidelines (*CACFP) found at www.fns.usda.gov/cacfp/meals-and-snacks. Even during periods of slower growth, children must continue to eat nutritious foods. With limited appetites and selective eating by toddlers and preschoolers, less nutritious foods should not be served as they can displace more nutritious foods from the child’s diet. Proper seating while eating reduces the risk of food aspiration and improves comfort in eating.7

7 Caring for Our Children: National Health and Safety Performance Standards Page 174 & 177, cfcenrckids.org
A. Children are at a high risk for contracting food-borne illness, as their bodies are in the process of growing, developing, and building adequate immune systems to fight illness. While some food-borne illnesses originate at farms or food manufacturing plants, the majority are the result of poor food handling practices.

B. If a child care facility provides food to children in care, it must provide nutritious meals and snacks of a quantity and quality to help meet the daily nutritional needs of the children. The USDA MyPlate is to be used to determine which food groups to serve at each meal or snack serving size and age appropriateness of the selected foods for children. Copies of the USDA MyPlate dieting guidelines may be obtained from the USDA website at http://www.choosemyplate.gov.

C. Foods that are associated with young children’s choking incidents should not be served to children under 4 years of age; such as, but not limited to, whole/round hot dogs, popcorn, chips, pretzel nuggets, whole grapes, nuts, cheese cubes and any food sized and shaped, especially or shape that can conform to the shape and size of the trachea (windpipe).

D. If a facility chooses to provide food to children directly or by contact with an outside source such as a caterer, the food must be free from spoilage and handled in a sanitary manner at all times. The facility must have adequate equipment available to maintain food safety.

1. Meat, poultry, fish, dairy products, and processed foods must have been inspected under the United States Department of Agriculture requirements.
2. No raw milk or unpasteurized juice may be served without the written consent of the parent or legal guardian.
3. No home-canned food may be served.
4. No homegrown eggs may be served.
5. Recalled food items must be discarded and removed from the facility.
6. All raw fruits and vegetables must be washed thoroughly before being served or cooked.
7. To prevent food from becoming potentially hazardous, hot foods must be maintained at a temperature of 135 degrees Fahrenheit or above, and cold foods must be maintained in accordance with section 3.9.2
8. Food must be thoroughly cooked and/or reheated according to the following table:

<table>
<thead>
<tr>
<th>Food</th>
<th>Minimum Internal Temperature</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fruits, Vegetables, Grains, and Legumes</td>
<td>135° F</td>
</tr>
<tr>
<td>Roasts (Fresh Beef, Pork and Lamb)</td>
<td>145° F (with a 3 minute rest time)</td>
</tr>
<tr>
<td>Fish</td>
<td>145° F</td>
</tr>
<tr>
<td>Eggs</td>
<td>Cook until yolk and white are</td>
</tr>
</tbody>
</table>
Egg dishes 160° F
Ground meats (beef, pork, and lamb) and fresh ham (raw) 160° F
Poultry - whole, parts, or ground 165° F
Leftovers 165° F
Foods cooked in microwave 165° F
Sauces, gravy, soups, casseroles 165° F

E. If a facility chooses to provide or make available food to children in care from an outside source, such as a caterer, or a licensed child care facility under the same ownership that includes a food preparation area that meets licensing standards, or as the result of a learning activity provided by a child care program, such as a garden, it is the responsibility of the provider to ensure all food intended for consumption by a child in care is free from spoilage and contamination and safe for human consumption.

1. A log must be maintained for all prepared meals being transported into the facility. The log must be retained for a minimum of 4 months. The log must include the delivery date, time of arrival, quantity and types of food, verification by the recipient of adequate temperatures of food, and the name and signature of the recipient.

2. Parents and legal guardians must be advised in advance of each food-related activity, such as special occasions and learning activities that include food consumption. Written parental permission may be obtained in the form of a general or specific permission slip. Documentation of parent permission for food activities must be maintained for a minimum of four months from the date of each activity.

F. If a facility chooses not to provide meals and snacks, arrangements must be made with the custodial parent or legal guardian to provide nutritional food for the child. In the event that a child’s parent fails to provide nutritious meals/snacks, the program must provide supplemental food items to complete the child’s meal.

G. If a special diet is required for a child by a physician, a copy of the physician’s order, a copy of the diet, and a sample meal plan for the special diet must be maintained in the child’s file and followed. If the custodial parent or legal guardian notifies the program of any known food allergies, written documentation must be maintained in the child’s file for as long as the child is in care. Special food restrictions must be shared with staff posted in an easily seen location and followed.

H. Meal and snack menus must be planned, written, dated, and posted at the beginning of each week in an easily seen place, accessible to the parents. Any menu substitutions must be noted on the menu. A generalized menu of possible snack choices for programs that receive food donations is
acceptable. All meals and snacks prepared outside of the facility’s kitchen or designated food preparation area, such as catered food, must be listed along with the source. Daily meal and snack menus must be maintained for a minimum of four months for licensing purposes. Operators who participate in the USDA Food Program must keep menus in accordance with the Department of Health and USDA requirements.

3.9.4 Dishwashing and Sanitization

For facilities that prepare food, non-disposable food equipment, tableware, and utensils utilized for food preparation must be properly cleaned by pre-rinsing or scraping, washing, rinsing, sanitizing, and air drying. If the child care facility lacks adequate dishwashing and sanitation described in this section for dishes, equipment and utensils, only disposable single-use items may be used. All single service items must be discarded after each use. Food equipment, tableware and utensils used to prepare food must be washed and sanitized on-site except when a catered is used and the caterer is responsible for dishwashing as evidenced by a written agreement. Dishwashing and sanitization must be accomplished by one of the following:

A. A dishwasher with a sanitizing cycle.
   1. The dishwasher must use heat or chemical injection for sanitization.
   2. If chemical sanitization is used, the wash water temperature must be set at a minimum of 120 degrees Fahrenheit, and the rinse water must be maintained at 75 degrees Fahrenheit.
   3. Automatic sanitizing dispenser must be properly installed and maintained.
   4. A test kit or other device that accurately measures the concentration of the sanitizing solution must be available and used to confirm appropriate concentration of solution during one full cycle per day.
   5. If hot water is used for sanitization, the dishwasher must achieve a temperature of 160 degrees Fahrenheit on the surface of the equipment/dishes/utensils being washed.
   6. The facility must have a means for measuring the required temperature either by an irreversible registering temperature indicator (heat strip) or an external temperature display built into the machine.

B. An installed three compartment sink or an installed two-compartment sink with a non-stationary or portable compartment receptacle.
   1. Installed compartment sinks may be used to wash produce and to fill cooking pots and pans with water when not in use for dishwashing.
   2. Sinks must be sanitized before and after each use.
   3. The first compartment must be used for washing; the second compartment must be used for rinsing; and the third compartment must be used for sanitizing.
   4. If only an installed two-compartment sink is available, the second compartment must be used for rinsing and a non-stationary or portable compartment receptacle must be available and used to sanitize.
C. Chemical Sanitization.
   1. If chemical sanitization is used, an exposure time of at least 7 seconds is required for a chlorine solution of 50 mg/L that has a pH of 10 or less and a temperature of at least 75 degrees Fahrenheit.
   2. If other sanitizers are used, the manufacturer instructions must be strictly followed.
   3. A test kit or other device that accurately measures the concentration of the sanitizing solution must be available and used to confirm appropriate concentration of solution during each use.

D. Hot water sanitization.
   If hot water is used for sanitizing, equipment/dishes/utensils must be immersed for a period of at least one-half minute in hot water at a temperature of 170 degrees Fahrenheit or above.

3.9.5 Food Handling
A. Bottles and sippy cups provided by the facility must be washed, rinsed, and sanitized between each use and do not have to be labeled.
B. Bottles and sippy cups brought from home shall be individually labeled with the child’s first and last name and shall be returned to the custodial parent or legal guardian daily.
C. Milk and food must not sit out for longer than 15 minutes prior to the beginning of the meal to avoid contamination and spoilage.
D. Employees, volunteers, and substitutes, while distributing snacks and serving food, must use disposable gloves, utensils, or similar items to prevent skin contact with food.
E. Food provided by parents must be properly stored and handled in a sanitary manner at all times to prevent contamination or spoilage. If food is supposed to be kept cold, the food must be stored in a refrigerator until eaten, or parents must include ice packs to keep food cold.

3.9.6 Breastmilk, Infant Formula, and Food
A. Breastmilk and formula must be handled in a sanitary manner at all times and according to manufacturer’s instructions and instructions by parents.
B. The provider must make sure all formula and food brought from home are labeled with the child’s first and last name. The provider is responsible for the label; therefore if the label is not completed by the parent, the facility staff must put the label on when the formula or food is received.
C. Breastmilk or infant formula provided for a specific infant by a parent or guardian should not be fed to other children. In the event that the wrong breastmilk or formula is given to an infant in care, the provider must immediately inform the child’s parent or legal guardian of the incident, as well as the parent or legal guardian of the infant that the formula or
breastmilk was intended for. These incidents must be documented as an accident/incident.

D. Prepared bottles must be placed in the refrigerator immediately and used within 48 hours.

E. Due to the extreme risk of choking, solid foods, including cereal, may not be given in bottles or with infant feeders to children with normal feeding habits unless authorized by a physician. Solid foods may not be fed to an infant younger than 4 months of age unless directed by a physician. Solid foods must be of a safe consistency and must be developmentally appropriate for the age and developmental ability of the infant.

F. Previously opened baby food jars must not be accepted at the center. If food is fed directly from the jar by the caregiver, the jar can be used for only one feeding and the remainder discarded.

3.9.7 Bottle Warming
For optimum digestion, breastmilk and infant formula should be served at body temperature.

A. Bottle warming devices and crock pots, including cords, must be kept inaccessible to children at all times.

B. Devices must be maintained on the lowest possible temperature setting and must be secured in such a way as to prevent them from tipping over, splashing, or spilling.

C. Any bottle warming device that has a water reservoir must be emptied, washed, and refilled each day.

D. Bottled breast milk, infant bottles, and formula must not be heated in the microwave.

E. Heated bottles and foods must be tested before feeding to ensure heat is evenly distributed and to prevent injury to children.

F. A bottle can only be warmed once. A warmed bottle cannot be returned to the refrigerator or re-warmed.

G. All breastmilk and infant formula left in bottles after feedings must be discarded within one hour after serving an infant.

3.10 Sanitation

3.10.1 Handwashing
Employees, volunteers, substitutes, and children must wash their hands thoroughly with soap and running water, dry, and follow personal hygiene procedures for themselves and while assisting others. Examples of activities when handwashing is required include, but are not limited to: before and after eating, immediately following outdoor play, after toileting, following the use of any cleaners or toxic chemicals, before and after administering medication, and during food preparation and snack distribution.
A. Employees, volunteers, substitutes and children must follow the Centers for Disease Control guidelines for handwashing. Copies of the Center for Disease Control guidelines may be obtained from Appendix ?, www.cdc.gov or from the following link http://www.flrules.org/Gateway/reference.asp?No=Ref-03037.

B. The use of hand sanitizers does not substitute for handwashing. However, in areas away from the facility where no running water is available, hand sanitizers may be used. Examples of such places are field trips, nature trails or picnic areas where running water is not readily available.

C. Employees, volunteers, and substitutes with open wounds and/or injury that inhibits handwashing, such as casts, bandages, or braces, must not prepare food.

3.10.2 Drinking Water

Safe drinking water must be available to all children.

3.10.3 Diapering Requirements

A. When children in diapers are in care, a hand-washing station that includes a sink with running water, soap, trash receptacle, and disposable towels or hand drying machines that are properly installed and maintained shall be provided in the room or in an adjoining area which opens into the room.

B. Hands must be washed and dried thoroughly after each diapering or toileting procedure, and all surfaces that have been touched must be cleaned and sanitized or disinfected to prevent the spread of germs.

C. Handwashing sinks must not be used for food service preparation, dishwashing, or food clean up.

D. The diaper changing area must be physically separated from the food preparation, food service, and feeding area.

E. When children in diapers are in care, there must be a diaper changing area with an impermeable surface that is cleaned and sanitized or disinfected after each use.

F. Children must be directly attended at all times when being diapered or when changing clothes.

G. Items unrelated to diaper changing shall not be stored in the diaper changing area nor shall they be placed on the diaper changing table.

H. There must be a supply of clean diapers, clothing, and linens at all times.

I. When diapers, clothing or linens that are being used become soiled or wet, they are to be changed immediately, and properly disposed.

J. Soiled or wet disposable diapers must be disposed of in a plastic lined, securely covered container that is not accessible to the children. The container must be emptied, cleaned and sanitized or disinfected, at least, daily.
K. Soiled cloth diapers must be emptied of feces in the toilet and soiled or wet cloth diapers shall be placed in a securely covered container that is not accessible to the children. The container must be emptied, cleaned and sanitized or disinfected, at least, daily.

3.11 Indoor Equipment

Equipment, materials, furnishings, and play areas should be sturdy, safe and in good repair. Walls, ceilings, floors, furnishings, equipment, toys, and other surfaces should be suitable to the location and the users. They should be maintained in good repair, free from visible soil and clean. Equipment and furnishings should be placed to help prevent collisions and injuries, ensure proper supervision while meeting the objectives of the curriculum and permit freedom of movement by the children. Televisions should be anchored or mounted to prevent tipping over. Chairs and other furnishings that children can easily climb should be kept away from cabinets and shelves to discourage children from climbing to a dangerous height or reaching something hazardous. The program should make accommodations to the program environment and schedule so that children with special needs may participate.

A. A child care facility must make available toys, equipment, and furnishings suitable to each child’s age and development and of a quantity for each to be involved in activities.

B. Toys, equipment, and furnishings must be safe and maintained in a sanitary condition, and must be cleaned and sanitized or disinfected immediately or prior to another child’s use if exposed to bodily fluids, such as saliva.

C. Facilities must provide age appropriate seating for the number of children eating meals and snack at one time.

D. Indoor climbing structures require padding or carpet for landing.

3.12 Outdoor Equipment

A. A child care facility must provide and maintain enough usable equipment, and offer play activities suitable to the development of each child.

B. All playground equipment must be securely anchored, unless portable or stationary by design, in good repair, maintained in safe condition, and placed to ensure safe use by the children. Maintenance must include inspections conducted every month of all supports above and below the ground and of all connectors and moving parts. Documentation of maintenance inspections must be maintained for two years.

C. All equipment, fences, and objects on the facility’s premises shall be free from sharp, broken and jagged edges, and properly placed to prevent overcrowding or safety hazards in any one area.

D. Permanent or stationary playground equipment must have a minimum of 6 inches in depth of loose ground cover or other protective surface under the equipment and

---

8 Caring for Our Children: National health and Safety Performance Standards, Pages 239-240, cfoc.nrckids.org
within the fall zone that provides resilience, and is maintained to reduce the incidence of injuries to children in the event of falls.

E. Equipment used for climbing should not be placed over, or immediately next to, hard surfaces such as asphalt, concrete, dirt, grass, or flooring covered by carpet or gym mats not intended for use as surfacing for climbing equipment. All pieces of playground equipment should be placed over and surrounded by a shock-absorbing surface.

F. All equipment used in the outdoor play area must be constructed and maintained to allow for water drainage.

G. Sandboxes must be covered at the end of each day. The covering used must prevent access to the sandbox by animals.

4 Training

Training requirements of this section do not apply to child care personnel who do not work directly with the children such as cooks, book keepers, janitors who are consider other personnel. If at any time other personnel fill in for classroom staff and are in direct care of the children training is required.

Child care personnel in compliance with the school-age requirements shall be considered in compliance with the child care personnel training requirements.

4.1 Beginning Training

Child care personnel including volunteers who work 10 hours or more per month must begin training within 90 days of employment and successfully complete the Department’s training within 12 months from the date training begins. Training completion may not exceed 15 months from the date of employment in the child care industry in any licensed Florida child care facility.

4.2 Training Requirements

4.2.1 Part I Courses

Child care personnel must successfully complete 40 hours of child care training as evidenced by successful completion of competency examinations offered by the Department or its designated representative with a weighted score of 70 or better. Child care personnel who successfully completed the mandatory 40 hour Introductory Child Care Training prior to January 1, 2004 are not required to fulfill the competency examination requirement. Child care personnel must complete all of the following Part I courses:

A. Child Care Facility Rules and Regulations
B. Health, Safety and Nutrition
C. Identifying and Reporting Child Abuse and Neglect
D. Child Growth and Development
E. Behavioral Observation and Screening

4.2.2 Part II Courses
Child care personnel must also complete 10 hours of the following Part II courses:

A. Special Needs Appropriate Practices (10 hours), or
B. Understanding Developmentally Appropriate Practices (5 hours) and one of the following courses:
   1. Infant and Toddler Appropriate Practices (5 hours)
   2. Preschool Appropriate Practices (5 hours)
   3. School-Age Appropriate Practices (5 hours)

4.2.3 Early Literacy Training
Pursuant to Section 402.305(2)(d)5., F.S., all child care personnel must complete a single course of training in early literacy and language development of children ages birth through five years that is a minimum of five clock hours or .5 CEUs. Early literacy training must be completed within 12 months of date of employment in the child care industry. Proof of completion may be documented on a certificate of course completion, classroom transcript, or diploma. Child care personnel must complete one of the following:

A. One of the Department’s online literacy courses available on the department’s website.
B. One of the Department’s approved literacy courses. A list of these courses can be obtained from the department’s website.
C. One college level early literacy course (For credit or non-credit) if taken within the last five year.

4.2.4 Annual In-Service Training
Upon successful completion of the 40-hour introductory training requirements, child care personnel must complete a minimum of 10 clock-hours or one CEU of in-service training annually during the state’s fiscal year beginning July 1 and ending June 30.

A. The annual 10 clock-hours or one CEU of in-service training concentration on children ages birth through 12 must be completed in one or more of the following areas (college level courses will be accepted):
   1. Health and safety, including universal precautions, prevention of infectious diseases, sudden infant death syndrome, emergencies due to food and allergic reactions, shaken baby syndrome, use of safe sleep practices, administration of medicine, emergency preparedness, and handling of hazardous materials;
   2. Pediatric CPR;
   3. First Aid (may be taken to meet the in-service requirement only once every three years);
4. Nutrition;
5. Child development- typical and atypical;
6. Child transportation and safety;
7. Behavior management;
8. Working with families;
9. Design and use of child-oriented space;
10. Community, health and social service resources;
11. Child abuse;
12. Child care for multilingual children;
13. Working with children with disabilities in child care;
14. Safety in outdoor play;
15. Literacy;
16. Guidance and discipline;
17. Computer technology;
18. Leadership development/program management and staff supervision;
19. Age-appropriate lesson planning;
20. Homework assistance for school-age care;
21. Food safety training;
22. Developing special interest centers/spaces and environments;
23. Other course areas relating to child care or child care management;
24. Any of the online courses offered through the Department’s child care website.

B. Documentation of the in-service training requirement must be recorded on CF-FSP Form 5268, July 2012, Child Care In-Service Training Record, which is incorporated by reference, and included in the child care facilities’ personnel records. CF-FSP Form 5268 may be obtained from the department website at www.myflfamilies.com/childcare or from the following link http://www.flrules.org/Gateway/reference.asp?No=Ref-03033. A new in-service training record is required each fiscal year. The in-service training records for the previous two fiscal years must also be maintained at the child care facility for review by the licensing authority.

C. All child care personnel employed in the industry beyond 15 months, who change employment from one child care program to another during the fiscal year must complete the annual in-service training requirement.

D. Child care personnel not in compliance with the annual in-service training requirement described in this section must complete the remaining in-service training requirement within 30 days of the noncompliance finding by the licensing authority. These hours cannot be used to meet the current year’s in-service training requirements.

4.3 Break In Service
A. In the event an individual leaves the child care industry in compliance with training requirements and returns to the industry either at the same or a different child care facility, he or she will be given 90 days to comply with any new training requirements established during the gap in employment in the child care industry.
B. In the event an individual leaves the child care industry not in compliance with the training requirements and returns to the industry either at the same or a different child care facility, he or she must comply with the training requirements described in this section, as well as any new training requirements that may have been added during the gap in employment in the child care industry prior to re-employment.

4.4 Training Exemptions

4.4.1 Competency Examination Exemptions
Child care personnel have one opportunity, if they choose, to exempt from one of more of the Department’s Introductory Child Care Training courses prior to attending training by achieving a weighted score of 70 or better on the corresponding competency examination(s).

4.4.2 Educational Exemptions
A. The department or its designated representative will exempt from the Health, Safety and Nutrition; Child Growth and Development; and Behavioral Observation and Screening courses those child care personnel who meet one of the following educational qualifications:
   1. Associate’s degree or higher with six college credit hours in Early Childhood Education or degree in Elementary Education.
   2. An active National Early Childhood Credential (NECC) or an active Birth Through Five Florida Child Care Professional Credential (FCCPC).
B. The department or its designated representative shall exempt child care personnel with a Bachelor’s degree or higher in Early Childhood Education from the Understanding Developmentally Appropriate Practices course, the Infant and Toddler Appropriate Practices course, and the Preschool Appropriate Practices course.
C. The department or its designated representative shall exempt child care personnel with a Bachelor’s degree or higher in Elementary Education from the Understanding Developmentally Appropriate Practices course and the School-Age Appropriate Practices course.
D. The department or its designated representative shall exempt child care personnel with a Bachelor’s degree or higher in Exceptional Student Education from the Special Needs Appropriate Practices course.

There are no educational exemptions from the Child Care Facility Rules and Regulations course or from the Identifying and Reporting Child Abuse and Neglect courses.

4.4.3 Part II Exemption
Child care personnel employed at the same child care facility prior to October 1, 1992, with no break in employment with the same employer, are exempt from completing Part II of the child care training.
4.5 Documentation of Training
The Department’s training transcript is the only acceptable verification of successful completion of the Department’s training.

A. A copy of the Department’s Training Transcript may be obtained from the Department’s website at www.myflfamilies.com/childcare.

B. A copy of the training transcript must be included in each staff member’s personnel record maintained at the child care facility.

Any course completion certificate not documented on the training transcript will be considered invalid, requiring that the course(s) be retaken. Until the coursework is retaken and completed, child care facilities will be out of compliance for the mandatory training standard.

4.6 Staff Credentials
Pursuant to Section 402.305(3), F.S. a licensed child care facility must have a minimum of one credentialed staff member for every 20 children.

A. A credentialed staff member is defined as a child care professional who has been issued a Staff Credential Verification documented on the individual’s Training Transcript. Florida law requires that VPK instructional personnel possess an appropriate credential. If the department identifies that a designated VPK teacher does not have an active credential, the department will notify the local Early Learning Coalition or its designated representative.

B. To apply for a staff credential verification, a candidate must complete CF-FSP Form 5211, March 2009, Florida Child Care Staff Credential Verification Application, which is incorporated by reference, and may be obtained from the department’s website at www.myflorida.com/childcare. The candidate must meet one of the following five qualifications as cited on CF-FSP Form 5211:

1. An active National Early Childhood Credential (NECC).
2. Formal Educational Qualifications.
3. An active Birth Through Five Child Care Credential awarded as a Florida Child Care Professional Credential (FCCPC); Florida Department of Education Child Care Apprenticeship Certificate (CCAC), or Early Childhood Professional Certificate (ECPC).
4. An active School-Age Child Care Credential awarded as a Florida Child Care Professional Credential (FCCPC) or School-Age Professional Certificate (SAPC). Graduates who successfully complete a school-age training program offered by a branch of the U.S. Military will be recognized as having met the School-Age FCCPC requirement. A School-Age FCCPC will not be accepted to meet the minimum staff credential requirements for Voluntary Pre-Kindergarten (VPK).
5. Employment History Recognition Exemption. An Employment History Recognition Exemption shall not be accepted to meet the minimum staff credential requirements for Voluntary Pre-Kindergarten (VPK) or towards a Director Credential. Applications for Employment History Recognition Exemption will not be accepted after July 1, 2006.
4.6.1 Calculating Number of Credentialed Personnel Necessary
A. Child care facilities with 19 or fewer children or that operate less than eight hours per week are not subject to the staff credential requirement.

B. For every 20 children, a child care facility must have one child care staff member who meets the staff credential requirement. Based on this formula, child care facilities with 20-39 children must have one credentialed staff member, facilities with 40-59 children must have two credentialed staff members, and so on. The licensing authority will calculate the number of credentialed personnel required based on daily attendance.

C. Child care personnel meeting the staff credential requirement must work at the facility a minimum of 20 hours per week, excluding naptime. A credentialed staff person must be on-site during all operational hours for those facilities that operate 20 hours or less per week.

D. Volunteers who work at the facility a minimum of 20 hours per week and meet the credential requirement may be included in calculating the credential ratio.

E. Children who are five years old, and who are enrolled in and attend a kindergarten program or grades one and above are excluded from the credential ratio.

F. An individual with an inactive credential is ineligible to be counted as a credentialed staff member until the credential is renewed or the individual meets one of the qualifications listed in above.

4.6.2 On-Site Documentation
A copy of the Training Transcript for each credentialed staff member must be maintained on-site at the child care facility, in the employee personnel file, for review by child care licensing staff. Child care facilities must maintain written documentation of credentialed personnel’s work schedules for a period of four months. Examples of written documentation are employee time sheets, personnel work schedules, and employment records.

4.6.3 Staff Credential Renewal
A. To maintain an active National Early Childhood Credential, it must be renewed through the agency that awarded the original credential or renewed as a Florida Birth Through Five Child Care Credential. Once renewed, for licensing purposes, individuals must complete a CF-FSP Form 5211, Florida Child Care Staff Credential Verification Application to have the individual’s Training Transcript updated with renewed credential information. An individual with an inactive National Child Care Credential may submit a renewal application, but while inactive the individual shall not be counted to meet the staff credential requirement. The application will be reviewed, and if approved, a certificate will be issued with a renewal date of five years from the date the completed renewal application was processed.
B. A staff credential awarded for formal education qualifications is always active and does not need to be renewed.

C. To maintain an active Birth Through Five or School-Age Child Care Credential, every five years a candidate must complete the renewal Section of the CF-FSP Form 5211; if all criteria are met, the individual’s Training Transcript will be updated with renewed credential information. Renewal applications may be submitted by the candidate no earlier than one year prior to the end of the active period of the Birth Through Five or School-Age Child Care Credential. An individual with an inactive Birth Through Five or School-Age Child Care Credential may submit a renewal application, but while inactive the individual shall not be counted to meet the staff credential requirement. The application will be reviewed, and if approved, a certificate will be issued with a renewal date of five years from the date the renewal requirements are met.

D. A staff credential awarded for Employment History Recognition Exemption is always active and does not need to be renewed.

4.7 Director Credential
Section 402.305(2)(f), F.S., requires a child care facility to have a credentialed director. Every applicant for a license to operate a child care facility or a license for a change of ownership of a child care facility must document that the facility director has an active Director Credential prior to issuance of the license. An applicant for the Director Credential must meet the requirements referenced in CF-FSP Form 5290, March 2009, Florida Child Care Director Credential and Renewal Application, which is incorporated by reference. CF-FSP Form 5290 may be obtained from the department’s website at www.myflfamilies.com/childcare. All applications and documentation will be verified, and if complete, the credential will be issued by the Department or designated representative on CF-FSP Form 5252, April 2006, Florida Director Credential Certificate, which is incorporated by reference.

A. An individual may not be the director of child care facilities that overlap in the hours of operation.

B. Each child care facility must have a credentialed director who is on-site a majority of hours, excluding weekends and evening hours that the facility is in operation. Documentation of majority of hours must be maintained and available for review by the licensing authority.

C. Every applicant for a license to operate a child care facility or a license for a change of ownership of a child care facility must document that the facility director has an active Director Credential prior to issuance of the license.

D. Child care facility owners must notify the licensing authority within five working days of when the facility loses a credentialed director or when there is a change of director.

1. The licensing authority will then issue a provisional license for a period not to exceed six months for any facility without a credentialed director.

2. The provisional license will have an effective date of the first day the facility was
without a credentialed director.

E. CF-FSP Form 5252, Florida Director Credential Certificate, must be maintained at the facility for review by the licensing authority.

4.7.1 **Exceptions to Director Credential Requirement**
A. A credentialed director is not required during evening hours as defined in Section 402.302(6), F.S.
B. Pursuant to Section 402.305(1)(c), F.S., a credentialed director may supervise multiple before-school and after-school sites.

4.7.2 **Director Credential Requirements for Before-School and After-School Sites**
A. A credentialed director may supervise multiple before-school and after-school sites for a single organization as follows:
   1. Three sites regardless of the number of children enrolled, or
   2. More than three sites if the combined total number of children enrolled at the sites does not exceed 350. In calculating the total number of children enrolled, the number of children in the before-school and after-school program shall be calculated and viewed as separate programs.
   3. In counties where the public school district has included four year-old children in public before-school and after-school programs, the school district may participate in the multi-site supervision option. Public school districts which serve four year old children in the before-school and after-school programs are required to have a credentialed staff person pursuant to the credentialing requirements in order to accommodate the four year-old children.
B. When a credentialed director is supervising multiple sites, the individual left in charge of the site during the director’s absence must meet the following requirements:
   1. Be least 21 years of age;
   2. Have completed the approved 40 clock-hour Introductory Child Care Training approved by the department; and
   3. Have completed the department’s Part II specialized training course, Special Needs Appropriate Practices, or completed a minimum of eight hours of in-service training in serving children with disabilities; or
   4. Have completed the department’s 10-hour School-Age Appropriate Practices specialized training module or the 5-hour Understanding Developmentally Appropriate Practices course and the 5-hour School-Age Appropriate Practices course.

4.7.3 **Director Credential Renewal**
A. To maintain an active Director Credential at either level, candidates must complete the renewal section of the CF-FSP Form 5290, March 2009,
Florida Child Care Director Credential and Renewal Application, which may be obtained from the department’s website at www.myflorida.com/childcare.

B. A Director Credential renewal, as documented on CF-FSP Form 5252, Florida Director Credential Certificate is active for five years from the date of issuance. The completed renewal application, including all required documentation, may be submitted to the department for review, and issuance of a Director Credential Renewal Certificate no earlier than one year prior to the end of the active period of the Director Credential. The Director Credential renewal date is determined by the end date of the active period.

C. If a renewal application is received after the end of the active period for the Director Credential, the Director Credential Renewal Application will be reviewed, and, if approved, a certificate will be issued with a renewal date of five years from the date the completed renewal application was processed.

4.8 Training Providers

4.8.1 Part I and Part II Training Providers
Child care professionals approved to teach the department’s Child Care Training courses must meet, at a minimum, the following qualifications:

A. Be at least 21 years of age.

B. Have completed the Department’s six clock hour Train-the-Trainer course.

C. Have one of the following educational and experiential credentials verified by the Department or its designated representative:

1. Four year college degree or higher with six college credit hours in Early Childhood Education and 480 hours experience in a child care setting serving children ages birth through eight years. A Florida teaching certificate may be substituted for the 480 hours experience in a child care setting.

2. Associate’s degree in Early Childhood Education and 480 hours experience in a child care setting serving children ages birth through eight years.

3. Associate’s degree with six college credit hours in early childhood/child growth and development and 960 hours experience in a child care setting serving children ages birth through eight years.

4. Four year college degree with a Florida teaching certificate and be currently employed by a school district in the state of Florida to teach Early Childhood Education in the Education and Training Cluster under the Department of Education Career and Technical Education Program. Trainers who meet this education and experience qualification are limited to teaching only in the Florida Department of Education Early Childhood Professional Certificate (ECP) and Child Care Apprenticeship Certificate (CCAC) programs.

5. A high school diploma or GED; a National Early Childhood Credential
or a department-approved Birth Through Five FCCPC and three years of full-time experience in licensed family child care within the past five years. Trainers who meet this education and experience qualification are limited to teaching only the six hour Family Child Care Home Rules and Regulations course.

6. Four year college degree or higher with six college credit hours in Elementary Education, and 480 hours experience in a child care setting serving school-age children ages birth through twelve years. A Florida teaching certificate may be substituted for the 480 hours experience in a child care setting. Trainers who meet this education and experience qualification are limited to teaching only the ten hour School-Age Appropriate Practices course.

D. The department or its designated representative may require a trainer to attend a specific child care training course prior to being approved.

4.8.2 Director Credential Training Providers
The department is responsible for reviewing and approving “Overview of Child Care Management” courses offered through vocational-technical schools, community colleges, and universities to determine if the requirements for the Director Credential coursework are met. A list of approved “Overview of Child Care Management” courses may be obtained from the department’s website at www.myflfamilies.com/childcare.

A. Applications for new coursework will no longer be accepted by the department. Child care program administration courses offered for college credit may be reviewed for approval.

B. All college level coursework pertaining to the following content areas will be accepted as approved coursework towards the Advanced Level Director Credential requirements:

1. Child Care and Education Organizational Leadership and Management;
2. Child Care and Education Financial and Legal Issues; and
3. Child Care and Education Programming.

4.8.3 Florida Birth through Five and School-Age FCCPC Child Care Professional Credential Training Program Providers
The department is responsible for reviewing and approving Birth Through Five and School-Age FCCPC Training Providers.

A list of approved Birth Through Five and School-Age FCCPC Training Providers” may be obtained from the department’s website at www.myflfamilies.com/childcare.

A. Applications for new coursework will no longer be accepted by the department.

B. The operational status of a training provider that has been approved provide the Birth Through Five and/or School-Age FCCPC Program and is currently
accepting students will be referred to as “open.” An open FCCPC Birth Through Five training provider shall submit the signed attestation page of CF-FSP 5191 annually to the department or its designated representative, and an open FCCPC School-Age training provider shall submit the signed attestation page of the CF-FSP 5257 annually to the department or its designated representative. Open FCCPC training providers must ensure availability of all training program files to the department upon request and be subject to both informal and formal audits/observations. Open FCCPC training providers who wish to change their program status to Non-operational or Closed must notify the department in writing of their intent and if they currently have enrolled students, they must provide a teach out plan to the department for the students to ensure they have an opportunity to complete their credential work.

C. The operational status of a training provider who has been approved to provide the Birth Through Five and/or School-Age FCCPC Program but is not currently accepting students shall be referred to as “non-operational.” Non-operational Birth Through Five and School-Age FCCPC training providers are required to maintain program accreditation or licensure during the time they are not accepting students. The signed attestation page of the CF-FSP 5191 (Birth Through Five Providers) and CF-FSP 5257 (School-Age Providers) is to be submitted annually to the department or its designated representative. Prior to returning to Open status, the training provider must notify the department in writing of the intent to re-open the program and receive written approval from the department before enrolling students.

D. The operational status of a training provider who has failed to maintain the requirements of the birth Through Five and/or School-Age FCCPC program or has voluntarily decided to no longer accept students shall be referred to as “closed.” Closed Birth Through Five and School-Age training providers may not teach the FCCPC program.

Training providers that offer the Birth Through Five and/or School-Age FCCPC training shall submit FCCPC training student completion documentation in the prescribed format to the department for issuance of the FCCPC, and to update the graduate’s child care Training Transcript.

5 Health Requirements

There are three common modes of transmission for the spread of microorganisms in child care settings: contact, droplet, and airborne. Many common infections encountered in the child care setting are transmitted by direct or indirect contact. Child care facilities must adopt policy standard precautions developed by CDC and prevention to handle potential exposure to blood and potentially infectious fluids. Personnel are required to be educated regarding standard precautions before beginning to work.

5.1 Communicable Disease Control

A. Children in care must be observed on a daily basis for signs of communicable disease.
B. Any child, child care personnel, or other person in the child care facility suspected of having a communicable disease must be removed from the program or placed in an isolation area until removed. Such person may not return without medical authorization, or until the signs and symptoms of the disease are no longer present. Child care personnel that work in the food preparation area may not return until the signs and symptoms of the disease have not been present for 48 hours.

C. A child’s condition must be reported to the custodial parent or legal guardian.

D. Signs and symptoms of suspected communicable disease include:
   1. Severe coughing, causing a child to become red or blue in the face or to make a whooping sound;
   2. Difficult or rapid breathing;
   3. Stiff neck;
   4. Diarrhea (more than one abnormally loose stool within a 24-hour period);
   5. Temperature of 101 degrees Fahrenheit or higher in conjunction with any other signs of illness;
   6. Pink eye;
   7. Exposed, open skin lesions;
   8. Unusually dark urine and/or gray or white stool;
   9. Yellowish skin or eyes; or
   10. Any other communicable disease symptoms.

E. A child identified as having head lice must not be permitted to return until the following day, and then only if treatment has occurred and been verified. Verification of treatment may include a product box, box top, empty bottle, or signed statement by a parent that treatment has occurred. The child care facility must treat areas, equipment, toys, and furnishings with which the child has been in contact.

5.1.1 Isolation Area
A. Each facility must have a designated isolation area for a child who becomes ill while in care.

B. Such space must be adequately ventilated, cooled, heated, and equipped with a bed, mat, or cot, and materials that can be cleaned and sanitized or disinfected easily.

C. Linens are to be changed after each use, and used linens must be kept in a closed container in the isolation area until cleaned.

D. Disposable items must be kept in a closed container in the isolation area until thrown away.

E. The isolated child must be within sight and hearing of a staff person at all times. The child must be carefully observed at all times for worsening conditions.

5.1.2 Outbreaks
A. Operators are required to notify the local county health department immediately upon any suspected outbreak of communicable disease and must follow the health department’s direction.
B. A suspected outbreak occurs when two or more children or employees have the onset of similar signs or symptoms within a 72-hour period or when a case of a serious or reportable communicable disease is diagnosed or suspected in a child or employee. Some examples include shigella, salmonella, chicken pox, measles, and hand, foot and mouth disease. Contact your local health department for a determination of whether reporting is required.

5.2 First Aid and Cardiopulmonary Resuscitation (CPR)
A. One staff member with current and valid certificate(s) of course completion for first aid training and one staff member with current and valid certificate of course completion for infant and child cardiopulmonary resuscitation (CPR) procedures must be present at all times that children are in care, the same staff member may satisfy both requirements.

B. One staff member satisfying these training requirements shall be present at all times that children are in care at the facility, on field trips which includes all activities away from the program, and during all transportation activities.

C. In the event a group of children are away from the program on a field trip and other children remain at the facility, there must be one staff member satisfying these training requirements present at each location at all times, both on-site and on the field trip.

D. Certificates of course completion are valid based on the time frames established by each first aid and CPR training program, not to exceed three years.

E. CPR courses must include on-site, instructor-based skill assessments by a certified CPR instructor. Documentation of completion of the online course and on-site assessment must be maintained at the facility and available for review by the licensing authority.

F. Documentation identifying which staff members have met the first aid and child CPR training requirement must be kept on file.

5.3 First Aid Kit Minimum Requirements
A. At least one first aid kit must be maintained on the premises at all times. The kit(s) must be accessible to the child care staff at all times and kept out of the reach of children. If the first aid kit is stored in the food preparation area, it must be stored in a manner to prevent contamination of food, food contact surfaces, or first aid supplies.

B. A first aid kit must be accessible and available to child care staff when children are participating on field trips, during transporting, and other activities away from the facility.

C. Each kit must be kept in a closed container and labeled “First Aid” and must, at a minimum, include:

1. Liquid Soap and/or hand sanitizer (to be used with supervision if hands are not visibly soiled and if no water is present),
2. Adhesive bandages,
3. Disposable, non-porous gloves,
4. Cotton balls or applicators,
5. Sterile gauze pads or rolls,
6. Adhesive tape,
7. Digital thermometer,
8. Tweezers,
9. Pre-moistened wipes,
10. Scissors,
11. Bottled water (for cleaning wombs or eyes), and

5.4 Emergency Telephone Numbers
A. Emergency service telephone numbers must be posted on or near all telephones, including 911, ambulance, fire, police, poison control center, Florida Abuse Hotline, and the county public health department. Additionally, the address and directions to the facility must be posted with descriptions of major intersections and local landmarks.
B. For life threatening injuries, the provider shall call 911 and then notify the parent.
C. Custodial parents or legal guardians must be notified immediately if the event of any serious illness, accident, injury or emergency to their child, and their specific instructions regarding action to be taken under such circumstances must be obtained and followed.
D. If the custodial parent or legal guardian cannot be reached, the facility owner or director will contact those persons designated by the custodial parent or legal guardian to be contacted under those circumstances, and must follow any written instructions provided by the custodial parent or legal guardian on the enrollment form.

5.5 Accident/Incident Notification
A. All accidents and incidents that occur while a child is in the care of program staff must be documented on the same day they occur.
B. This documentation must be shared with the custodial parent or legal guardian on the date of occurrence.
C. Documentation must include the name of the affected party, date and time of the occurrence, description of the occurrence, actions taken and by whom, and appropriate signatures of program staff and the custodial parent of legal guardian.
D. The documentation must be maintained for one year. If the parent or legal guardian does not pick up the child on the date of occurrence of the accident or incident, the individual authorized to pick up the child must sign and be provided a copy of the accident/incident form.
E. In the event of serious injury or death, the incident must immediately be reported to the licensing authority.
5.6 Medication
Child care programs are not required to give medication; however, if a program chooses to do so, it must comply with the following requirements:

A. The child care program must have written authorization from the custodial parent or legal guardian to give prescription and non-prescription medications. This authorization must be dated and signed by the custodial parent or legal guardian and contain the child’s name; the name of the medication to be given; and date, time and amount of the correct dosage to be given.

B. Any known allergies to medication or special restrictions must also be documented, maintained in the child’s file, shared with staff and posted with the child’s stored medication.

C. Prescription and non-prescription medication brought to the child care facility by the custodial parent or legal guardian must be in the original container. Prescription medication must have a label stating the name of the physician, child’s name, name of the medication, and medication directions. All prescription and non-prescription medication must be dispensed according to written directions on the prescription label or printed manufacturer’s label.

D. In the event of an emergency, non-prescription medication that is not brought in by the parent or legal guardian can be dispensed only if the program has written permission from the parent or legal guardian to do so.

E. Any medication given under these conditions must be documented in the child’s file, and the custodial parent or legal guardian must be notified on the day of occurrence.

F. The facility must maintain a record for each child receiving any medications that documents the full name of the child, the name of the medication, the date and time the medication was given, the amount and dosage, and the name and signature of the person who gave the medication. This record must be initialed or signed by the program personnel who gave the medication. This record must be initialed or signed by the program personnel who gave the medication. The record must be maintained for a minimum of four months after the last day the child received the dosage.

G. All medication must have child resistant caps, if applicable, and must either be stored in a locked area or must be out of any child’s reach. If medication is stored in the food preparation area, it must be stored in a manner to prevent contamination of food, food contact surfaces, or medication.

H. Medication that has expired or that is no longer being dispensed must be returned to the custodial parent or legal guardian or discarded.

6 Record Keeping
Each of the records described in this section must be maintained at the program location and must be available during the hours of operation for review by the licensing authority:

A. A copy of all background screening clearance documents for the director and owner
must be provided to the Department to be included in the Department’s official licensing file.

B. The following is a list of documentation that is required to be at the facility for review by the licensing authority:

1. Driver’s log must be retained for a minimum of four months.
2. Documentation of parental permission for field trips and food activities/special occasions must be retained for a minimum of four months.
3. Facility’s written disciplinary policies.
4. Daily attendance of children records must be maintained for a minimum of four months.
5. Written record of fire drills must be maintained for a minimum of one year.
6. Documentation of staff members that have met the first aid and infant and child cardiopulmonary resuscitation (CPR) training requirement.
7. Posted emergency telephone numbers, the facility address, and directions to the facility.
8. Documentation of accidents/incidents must be maintained for one year.
9. Emergency evacuation plan and emergency preparedness plan. Written records of emergency preparedness plan drills must be maintained for one year from each drill.
10. Record for each child receiving medication must be maintained for a minimum of four months after the last day the child received the dosage.
11. Sample meal plan for special diet (if applicable). A copy of the physician’s order, a copy of the diet, and a sample meal plan for the special diet must be maintained for as long as the child is in care.
12. Written documentation of known food allergies (if applicable). Must be maintained for as long as the child is in care.
13. Daily meal and snack menus, including meal substitutions must be maintained for four months.
14. Food Acceptance Log must be retained for a minimum of four months.
15. Copy of license or permit for caterers.

C. Copies of required records are acceptable for documentation. Original documents are the property of the party providing the information.

6.1 Immunization Records

The child care facility is responsible for obtaining for each child in care a current, complete and properly executed Florida Certification of Immunization form Part A-1, B, or C, DH 680 (July 2010) or the Religious Exemption from Immunization form, DH 681 (July 2008), which are incorporated herein by reference, from the custodial parent or legal guardian. DH Form 680 and DH Form 681 may be obtained from the local county health department. Specific immunization requirements are included and detailed in the most current edition of the “Immunization Guidelines-Florida Schools, Child Care Facilities and Family Day Care Homes” as promulgated by the Florida Department of Health.

A. Immunizations received out-of-state are acceptable; however immunizations must be documented on the Florida Certification of Immunization form and must be signed
by a physician practicing in the State of Florida.

B. If the custodial parents or legal guardians fail to provide the documentation required above within 30 days of enrollment, the facility shall not allow the child to remain in the program.

C. School-aged children attending public or non-public schools are not required to have student health examination and immunization records on file at the child care facility as such records are on file at the school where the child is enrolled.

D. If the custodial parents or legal guardians need assistance concerning these requirements, the facility shall refer them to the Department of Health or to the child’s physician.

E. Medical records in this section are the property of the custodial parent or legal guardian and must be returned to them when the child withdraws from the facility. The medical records are transferable if the child attends another facility.

6.2 Student Health Records

The child care facility is responsible for obtaining for each child in care a current, complete and properly executed Student Health Examination form DH 3040 (July 2013), which is incorporated herein by reference and may be obtained from the local county health department, the parent or legal guardian, or a signed statement by authorized professionals that indicate the results of the components of the Student Health Examination form are included in the health examination.

A. The Student Health Examination shall be completed by a person given statutory authority to perform health examinations.

B. The Student Health Examination or the signed statement is valid for two years from the date the physical was performed. An up-to-date version must be on file for as long as the child is enrolled at the facility.

C. If the custodial parents or legal guardians fail to provide the documentation required above within 30 days of enrollment, the facility shall not allow the child to remain in the program.

D. School-aged children attending public or non-public schools are not required to have student health examination and immunization records on file at the child care facility as such records are on file at the school where the child is enrolled.

E. If the custodial parents or legal guardians need assistance concerning these requirements, the facility shall refer them to the Department of Health or to the child’s physician.

F. Medical records in this section are the property of the custodial parent or legal guardian and must be returned to them when the child withdraws from the facility. The medical records are transferable if the child attends another facility.

6.3 Enrollment Information

The facility operator shall obtain enrollment information from the child’s custodial parent or legal guardian prior to accepting a child in care. This information shall be
documented on CF-FSP Form 5219, March 2009, Child Care Application for Enrollment, which is incorporated by reference, or an equivalent form that contains all the information required by the department on CF-FSP Form 5219. CF-FSP Form 5219 may be obtained from the licensing authority or on the department’s website at www.myflfamilies.com/childcare.

A. Enrollment information shall be kept current and on file.

B. The child shall not be released to any person other than the person(s) authorized or in the manner authorized in writing by the custodial parent or legal guardians.

C. There shall be signed statements from the custodial parents or legal guardian that the child care facility has provided them with the following information:

1. The department child care facility brochure, CF/PI 175-24, October 2007, Know Your Child Care Facility, which is incorporated by reference. This brochure may be obtained from the department’s website at www.myflorida.com/childcare. Local licensing agencies may use an equivalent brochure approved by the department.

2. The child care facility’s written disciplinary policy.

3. The child care facility’s food and nutrition policies that includes language on food safety and food allergens.

4. Annually, during the months of August and September, the child care facility director must provide parents with information detailing the causes, symptoms, and transmission of the influenza virus. To assist providers the department developed a brochure, CF/PI 175-70, June 2009, Influenza Virus, Guide to Parents, which may be obtained from the department’s website at www.myflorida.com/childcare.

5. Prior to beginning volunteering in a child care facility, a CF-FSP 5217, July 2012, Volunteer Acknowledgment which is incorporated by reference, and may be obtained from the department’s website www.myflorida.com/childcare or from the following link http://www.frlrules.org/Gateway/reference.asp?No=Ref-03032, must be completed and on file at the child care facility for the volunteer.

6.4 Personnel Records

Records must be maintained and kept current on all child care personnel, as defined by Section 402.302(3), F.S., and household members if the facility is located in a private residence. These shall include:

A. An employment application with the required statement pursuant to Section 402.3055(1)(b), F.S.

B. Position and date of employment.

C. CF-FSP Form 5337, March 2009, Child Abuse & Neglect Reporting Requirements, which is incorporated by reference, must be signed annually by all child care personnel.

D. Copies of training information and credentials as applicable.

E. For the driver only- Driver’s license and driver physical examination documentation.
A copy of the driver’s license and the physician certification, or another form containing the same elements of the physician certification, granting medical approval to operate the vehicle, and valid certificate(s) of course completion for first aid training, pediatric cardiopulmonary resuscitation (CPR) procedures, and background screening must also be maintained in the driver’s personnel file.

6.4.1 Background Screening

A. Initial Screening. A screening must be conducted as a condition of employment.

1. Level 2 screening as defined in Section 402.305, F.S., is required for all child care personnel and includes a criminal records check (both national and statewide), a sexual predator and sexual offender registry search, and child abuse and neglect history of any state in which an individual resided during the preceding 5 years. All fingerprints must be submitted and processed through the Background Screening Clearinghouse and therefore a LiveScan vendor that is Clearinghouse compatible must be used for submission of fingerprints.

2. The fingerprint results from the Federal Bureau of Investigation will be returned to DCF via the Florida Department of Law Enforcement. DCF will review both the federal and state criminal history results, along with state criminal records, national sex offender registry, and the child abuse and neglect registry.

3. DCF will issue an eligible or non-eligible result for employment through the Clearinghouse upon completion of searches and results from other states, if applicable.

4. DCF will send a letter/email to the employer advising of the search of the Florida’s child abuse and neglect registry.

5. The employer/owner/operator must conduct employment history checks, including documented attempts to contact each employer that employed the individual within the preceding five years and documentation of the findings. Documentation must include the applicant’s job title and description of his/her regular duties, confirmation of employment dates, and level of job performance. The employer/owner/operator must make at least three attempts to obtain employment history information. Failed attempts to obtain employment history must be documented in the personnel file and include date, time, and the reason the information was not obtained.

6. The employer/owner/operator must send a request for a search of each state's criminal records if the individual has lived outside the state of Florida in the preceding five years. Visit www.myflfamilies.com/backgroundscreening, click on the National Records Request link to obtain instructions and forms to complete to submit a request for the search. Documentation of the date the search was requested, and the date the results were received, must be maintained in the employee’s file for review by the licensing authority.
Once results are received they must be forwarded to DCF Background Screening unit for review. The results may be faxed to: (850) 922-2895, emailed to: Background.screening@myflfamilies.com or mailed to: Department of Children and Families Background Screening Unit 1317 Winewood Boulevard, Building 6 Floor 3, Tallahassee, Florida 32399-0700.

7. The employer/owner/operator must send a request for a search of each state’s child abuse and neglect registry if the individual has lived outside the state of Florida in the preceding five years. Visit [www.myflfamilies.com/backgroundscreening](http://www.myflfamilies.com/backgroundscreening), click on the Out of State Abuse Registry Check link to obtain the instructions and forms to complete to submit a request for a search. Documentation of the date the search was requested, and the date the results were received, must be maintained in the employee’s file for review by the licensing authority.

8. The employer/owner/operator must conduct a search of the sexual offender/predator website in Florida via [https://offender.fdle.state.fl.us/offender/homepage.do](https://offender.fdle.state.fl.us/offender/homepage.do), and any state the individual has lived in outside the state of Florida in the preceding five years. Visit [www.myflfamilies.com/backgroundscreening](http://www.myflfamilies.com/backgroundscreening), click on the Out of State Sexual Predator/Offender Registry Check link to obtain the instructions and forms to complete to submit the request for a search. Documentation of the search date, and findings from each state, must be documented in the employee’s file for review by the licensing authority.

9. The employer/owner/operator must maintain on-site at the program copies/documentation of completion of all applicable elements in the screening process for an individual in the personnel file for review by the licensing authority.

10. Failure to initiate the screening through the Clearinghouse prior to fingerprinting will result in invalid screening and the individual will have be re-fingerprinted and pay the fees again.

11. Immediately remove individuals from the program roster when employment terminates.

**B. Re-Screening.** A screening conducted under this rule is valid for five years, at which time a re-screen must be conducted in the same manner as the initial screening.

1. The five year re-screen is required for all child care personnel.

2. The five year re-screen must include, at a minimum, a criminal records check (both national and statewide), a sexual predator and sexual offender registry search, and child abuse and neglect history of any
state in which an individual resided during the preceding 5 years.

3. Child care personnel must be re-screened following a break in employment in the child care industry that exceeds 90 days.

4. If child care personnel take a leave of absence, such as maternity leave, extended sick leave, migrant child care programs, etc. re-screening is not required unless the five year re-screen comes due during the leave of absence.

6.4.2 Background Screening Documents
A. Each personnel record must have a completed CF-FSP Form 5131, Background Screening and Personnel File Requirements, which is incorporated by reference.

B. CF Form 1649A, (insert new date), Child Care Affidavit of Good Moral Character, must be completed for all child care personnel at the time of initial screening or upon change in employer. CF Form 1649A may be obtained from the Department’s website at www.myflfamilies.com/childcare.

C. A copy of the eligible results generated from the Clearinghouse must be on record for each personnel.

D. A copy of the DCF letter/email informing of search conducted of the Florida’s child abuse and neglect registry must be on record for each personnel.

E. A copy of each request made to out of state child abuse and neglect registries for individuals that lived outside the state of Florida in the preceding five years.

F. A copy of each search conducted for out of state sexual offender/predator registries for individuals that lived outside the state of Florida in the preceding five years.

G. A copy of all background screening clearance documents for the director and owner must be included in the Department’s official licensing file or in accordance with the appropriate local licensing agency requirements.

6.5 Daily Attendance
Daily attendance of children must be taken and recorded by the child care personnel, documenting the time when each child enters and departs the program.

A. Attendance devices used for the purposes of tracking attendance may be used, but personnel must ensure the accuracy of the documented attendance. Each classroom
must have an attendance sheet/class roster for the group of children occupying that space.

B. The custodial parent or guardian may document the time when his/her child enters and departs the child care facility or program. However, child care facility personnel are responsible for ensuring that attendance records are complete and accurate.

C. If a child does not arrive to the program or the agreed upon designated pick-up location, child care personnel must communicate as early as possible (within one hour of the child’s scheduled arrival) with the custodial parent/legal guardian; if there was no prior communication from the custodial parent/legal guardian of the child’s absence. If child care personnel are unable to reach the child’s parent/guardian, emergency contacts must be notified.

D. Attendance records must be maintained for a minimum of four months.

E. Attendance records for Voluntary Pre-Kindergarten or School Readiness may be used, if applicable.

7 Access/Child Safety

7.1 Access
A child care facility must provide the custodial parent or legal guardian access, in person and by telephone, to the child care facility during the facility’s normal hours of operation or during the time the child is in care.

7.2 Child Safety
A. Acts or omissions that meet the definition of child abuse or neglect provided in Chapter 39, F.S., constitute a violation of the standards in section 402.301-.319, F.S., and will support imposition of a sanction, as provided in Section 402.310, F.S.

B. Failure to perform the duties of a mandatory reporter pursuant to Section 39.201, F.S., constitutes a violation of the standards in Section 402.301-.319, F.S.

C. Child care personnel must appropriately interact with children to foster a healthy, safe environment that will encourage the child’s physical, intellectual, motor, and social development. Interactions with children that are aggressive, demeaning or intimidating in nature are strictly prohibited.
