2	No	100.00%	1
	Total	100%	1

Q211 - This section is concerned with evaluating the sufficiency of information for the six domains of information collection. Reviewers should be evaluating the information in the FFA in regards to the sufficiency criteria for each domain. Reviewer should select "YES" if information is clearly documented and sufficient for decision making within the Family Functioning Assessment . Reviewer should select "NO, information is present but not sufficient" if the concepts are noted in the Family Functioning Assessment but the information is not sufficient to support decision making. Reviewer should select "NO, information not present" if the worker did not include the concepts in the Family Functioning Assessment. This decision is based upon the review of the Family Functioning Assessment as recorded in FSFN by the CPI. Case notes are reviewed, however reviewer determination is based solely on FFA completed. Feedback notes should indicate if the case record either negated or supported decision making not otherwise reflected in the FFA.

QID191 - This question is concerned with evaluating the assessment of caregiver protective capacities. Reviewer should select "YES" if information supports the identified caregiver protective capacities. Reviewer should select "NO, information is present but identified Caregiver Protective Capacities are not supported by the information. Worker may have selected caregiver protective capacities that are accurate, however may have selected others that are inaccurate or not supported by the information as being present, but rather absent. Reviewer should select "NO, information not present" to support the assessment of caregiver protective capacities when information is absent from the record to inform the caregiver protective capacities.

QID38 - Reviewer judgment: the information collected is adequate and reflects good quality to support: a) a reasonable understanding of family members and their functioning and b) to support and justify decision making. For safety intervention decisions, the information must be enough to identify, support, reconcile and justify the presence or absence of threats to safety and to inform and justify the kind of safety plan/safety management that occurs or that a safety plan or safety management is unnecessary.
