1. Strategy and Planning.

MISSION: Develop a framework for cross-agency statewide behavioral health strategy and planning.

In developing a path forward for the State following the currently contemplated sunset of the Commission in 2026, this Committee will hear presentations and testimony related to best practices for cross-agency, publicly accessible, comprehensive, statewide planning and strategy development, and develop recommendations for the creation of an ongoing framework for the Florida Legislature and Executive Office of the Governor to be presented with regularly delivered recommendations for the best-practice development of mental health and substance use disorder treatment across all publicly-funded State delivery systems.
