Finalized Enhancements

1. No Cost Enhancement UI Refresh (472336)
   - FEI continues to enhance its applications with modern technology and development standards. A User Experience (UX) team of experts has been working to improve the InfoBridge data warehouse application (on which FASAMS is developed) to more closely align with 508 compliance. The refreshed UI features a modern design with updated visuals, revised color palette, and modern icons that optimize screen real estate and improves accessibility throughout the application. This UI update will give users an improved user experience for the FASAMS portal. This update does **NOT** change functionality of FASAMS, but rather improves the overall look of the system.
