

Recovery Oriented System of Care

A Transformative Process

OUR VISION

Establish an integrated, values based recovery oriented system of care where recovery is expected and achieved through meaningful partnerships and shared decision making with individuals, communities and systems.

Goal

- Effective
- Equitable
- Efficient

Maximizes use of Natural Supports

Transformation from a system of acute care management to one focused on recovery and wellness.

Values

- Person Centered
- Choice
- Inclusive
- Person and Family Driven

Network of Systems and Communities

Focus on supporting people to create a meaningful, fulfilling life in their community

How

Grounded in Partnerships

- Cultural, values based change drives relationship, practice, policy and fiscal changes at all levels
- Everything is viewed thorough the lens of and aligned with recovery oriented values, principles and care

Outcome

- Prevent development of Behavioral Health conditions
- Reduced Harm caused by Behavioral Health conditions
- Sustain Wellness for Individuals and Families
- Improved Community Health
