2. Administrative Discharge Question

Some of Netsmart's providers have asked questions about Administrative Discharges. Do they still exist in FASAMS and if so, what the criteria is, how it affects Treatment Episode/Services data submitted, and how they are to be handled?

Administrative discharge is still identified in Chapter 5 for DischargeReasonCode

DischargeReasonCode	string	The code indicating the outcome of the treatment episode or discontinuance of treatment. Required Must be one of the following values:
		o 1 for Successfully Completed Treatment/Services
		 2 for Did not Complete Treatment-Voluntary (Examples: (lost contact, left against medical advice, eloped, failed to return from leave, and individual choice)
		 3 for Did Not Complete Treatment-Involuntary (Examples: Administrative discharge (no longer eligible for services, funding source change, assessment only, agency closure)
		o 4 for Successfully CompletedTransferred to Another Provider
		o 5 for incarcerated
		o 6 for Death
		o 8 for Transferred to State Mental Health Treatment Facility

Pamphlet 155-2 Chapter 5, Version 14.0

Last Revision Date: 05/24/2021

Effective Date: 7/01/2021

Page 59 of 68

Field	Value Type	Description/Validation Rules
-11/61/6///		o 9 for Client Moved Out of Service Area
		 10 for Client Only Received Non-Treatment Services (e.g. assessment detox, intervention, prevention, etc.)
		 14 for Did Not Complete Treatment-Transferred to Another Provider (i.e. Long Term Medical Care)
		This field is part of TEDS minimum data set for reporting DIS 10 — Reason for Discharge, Transfer or Discontinuance of Treatment Discharge.
		Note: Vocabulary Codes under review and may be updated by DCF policy makers.

Rich advised Administrative discharge does still exist with a code that does not complete treatment involuntary. He added it's still possible where you have a client that disappears without knowing what happened to said client. He doesn't think there was ever any formal policy on this, and his understanding is that each provider has their own local policies. Rich asked if due to the nature of an administrative discharge that there is no client available, do the rules need to be relaxed? Steve answered yes as they have administrative discharges frequently. He then asked if when it comes to his performance outcomes, he sees it a value code 3, is this different than how successful treatment is calculated vs. how it was done in the past? Rich said the code numbers may differ, but the calculation of successful treatment is still the same. Steve asked if in this case will they be able to suspend those data elements if its an administrative discharge? Rich answered yes, that's how it always been done.

Rich ended by saying SAMH will have to figure out which data elements they will not be required to answer on the POMS. Then we'd have to put it in the Pamphlet.

3. Option to include PAC in POM *NEW*

Some of our stakeholders have asked us to consider options to include PAC in the POM without having to wait for version 15. This would make it easier for them to

submit co-occurring admissions. We understand the need to not make significant changes to the system (i.e. data structure changes) without providing 6 months notice to the field. FEI has presented an option that might not require providers to make any changes to their submissions if choose not to; but, allow some providers a new option if they so choose. The details of this proposal will be discussed in the meeting.

Jesse opened by saying the idea of moving the program area code to the performance outcome measure entity has been around for quite some time. The concern is the amount of time required to get the systems updated for the correct data to be submitted. One option is in addition to the program area code being on admission also add it to the performance outcome measure entity as an optional field. Then, it essentially overrides what is submitted under admission. Nathan stated it seems like the team can do this, and he's heard back from some that this would be beneficial. This new field would be optional and not required. He wants to be sure that if the decision is made to implement this optional field, the ME's are prepared to receive it as it will have an impact on them and their systems.

Rich touched base on the actual problem to give more insight into this situation. In the historical resubmissions, you have a client who was originally a mental health only client with the appropriate mental health POMS records, but now in the resubmission the client is changed to co-occurring, and the record is rejected.

Mike said this makes sense but the likelihood of them being able to have this in place quickly isn't that great. He also wasn't comfortable providing a reasonable date at this time. Johnny added this is doable but the timing of this is the concern.

Rich added one of the advantages of this is it's not required, so if you don't need it, don't use it. Jesse stated the earliest this would be able to go into FASAMS would be November.

Sharyn asked what if everyone just answered every question? Adding NA where needed for questions they didn't need. Would this solve the issue altogether? Danielle said right now there are actual errors for answering certain questions which puts partners in a weird situation if they do want to report everything. Beau added he thinks "NA" would be used when it's actually not applicable which could cause more issues.

Jesse asked Dan to send a list of potential issues to SAMH.

4. Pamphlet 155-2 Update Process (Greg Nix) *NEW*

Greg shared his screen and provided detailed information on this topic.

New Action Items

#	Item Description	Assignee	Estimated Completion
1	Determine what rules need to be modified based on Dan Fields's questions concerning Administrative Discharge	Rich Power	6/28/2021
2	Prepare a description of remaining concerns regarding FARS/CFARS and CGAS to be presented in the next DAC meeting.	Sharyn Dodrill	6/28/2021
3	Contact Diego and Sharyn about concerns pertaining to subcontract usage	Jesse Lindsey	7/2/2021
